From: Pete Sandifer

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Thursday, June 12, 2014 at 10:50:10 AM Eastern Daylight Time

From: Marvin West

To: Gulf Council

Jun 12, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Marvin West

To Whom It May Concern:

I oppose red snapper reallocation through Reef Fish Amendment 28. Status Quo (No Action) is the only alternative I can support.

- Commercial fishermen have stayed within their annual catch limit every year while recreational fishermen have exceeded theirs in 6 of the last 7 years.
- Commercial fishermen have worked hard to promote conservation in order to help the red snapper population recover. Reallocation does not promote conservation and may actually hurt the red snapper population.
- Reallocation will not solve the problems of the recreational fishery and, in fact, will only make them worse. Reallocation will hurt commercial fishermen and take red snapper off the plates of the American consumer.

It's time the Council followed the law and gave recreational fishermen the right tools to manage their fishery properly. Taking quota away from commercial fishermen is not a solution. Thank you for the opportunity to comment.

Date: Wednesday, June 11, 2014 at 10:53:47 PM Eastern Daylight Time
From: Anna bergalis
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Wednesday, June 11, 2014 at 10:18:47 PM Eastern Daylight Time

From: Clint Elliott

To: Gulf Council

Jun 11, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Clint Elliott

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Wednesday, June 11, 2014 at 9:17:09 AM Eastern Daylight Time

From: Daniel Bauer

To: Gulf Council

Jun 11, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Daniel Bauer

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Tuesday, June 10, 2014 at 4:25:21 PM Eastern Daylight Time

From: Morris Pitre

To: Gulf Council

Jun 10, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Morris Pitre

Enough is enough!!! As if agent orange wasn't enough after oil spill! Stop Taking and killing to turn a quick buck.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Tuesday, June 10, 2014 at 1:22:11 PM Eastern Daylight Time

From: Rick Rogers

To: Gulf Council

Jun 10, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Rick Rogers

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Luis De La Garza

To: Gulf Council

Dear Governor and Gulf Council Members,

Please approve Amendment 28 to distribute more evenly and in a fair way the resources from the Gulf of Mexico.

It is a proven fact that a lb of recreational caught fish produces 1000 times more economic revenue than a commercially caught fish.

We can not and should not allow organizations bend the rules into what will be a loophole that will allow commercial fishermen to take paying customers out to catch Red Snapper 360 days of the year, when private citizens get a 9 day season.

Gov. Perry it is time to lead by example and show them than in Texas our resources will not be allowed to be manipulated by a few.

Respectfully,

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 9, 2014 at 7:19:48 PM Eastern Daylight Time

From: Clyde Gates

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Monday, June 9, 2014 at 2:19:18 PM Eastern Daylight Time

From: Capt. Mike Sullivan

To: Gulf Council

Jun 9, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Capt. Mike Sullivan

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

Texas's amazing Gulf of Mexico shoreline and waters have been under attack for two decades - at least! It's urgent that we do everything possible immediately to rebuild and then safeguard all that's been lost for the sake of our nation, our state and, especially, those families who have persevered in their efforts to earn a living, stabilize the environment, and retrieve a lost paradise!

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 9, 2014 at 9:50:27 AM Eastern Daylight Time

From: rachel gaudel

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" is exactly what we need to make the red snapper fishing available to the anglers who pay the fees to fish our local waters. For the private citizens who buy gear for the purpose of catching food for personal use.

No longer should we be denied while big corporate fishing and businesses profit by forcing us to have to purchase the red snapper we love and have available in our waters.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 9, 2014 at 8:33:13 AM Eastern Daylight Time

From: Jane Marquet

To: Gulf Council

Dear Governor and Gulf Council Members:

As a Gulf Coast resident, I am concerned that "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Sunday, June 8, 2014 at 8:29:18 PM Eastern Daylight Time

From: Judy Rafanelli

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: MARSHA LANDO

To: Gulf Council

Dear Governor and Gulf Council Members: My father was a deep sea fisherman that used to charter from Daytona Beach, it was our lively hood, unfortunately now there is so much overfishing. I also remember all of the sport fishers who caught there fish, and never took them with them. We ate a lot of fish and gave the rest to local fish stores. It is a way of life for many.

It is important to protect the environment and also those who live off of it.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Sunday, June 8, 2014 at 12:01:47 AM Eastern Daylight Time

From: Malva McIntosh

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Saturday, June 7, 2014 at 12:15:48 PM Eastern Daylight Time

From: Ashley Swinney

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 6, 2014 at 10:58:27 PM Eastern Daylight Time

From: mitch ellis

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Christine Smith

To: Gulf Council

Dear Governor and Gulf Council Members:

This is absolutely unfair to the "regular" people who aren't able to recreationally fish. I come from a fishing town and know how important that professionals be able to provide for restaurants. Otherwise the prices will go sky high and there will be more people out of work.(

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

From: Dana Merrill

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

To: Gov. Phil Bryant,

I have lived on the gulf coast for years. I am shocked what our government is doing to us to begin with. What really makes me most upset is that WE voted you all in to do what we want you to do for us as a whole, not as a greedy government that has gone out of control. This Red Snapper Reallocation Scheme is seriously stupid and taking away our fishermen's rights and this needs to be rethought and made to where everyone has rights!! We are still America, we should have choices, rights and pride living here!

Now in America we have lost too many rights, our healthcare is a disaster; our foods are being contaminated by GMO; poisoning our children with vaccinations; our skies are being sprayed; we are being forced to pay our tax money to put the poison Fluoride in our water which is a cancerous etc.; and trying to change what America was founded on which is our Constitution and Bill of Rights; every day we are being attacked on the first and second amendment! Why aren't ya'll listening to US??? When elections come around I will encourage everyone I know to vote for someone who hasn't been on our side and against what or why we voted you all in for.

Below is the pre-written statement of what I agree with. But I wanted to say something from my heart and hope that you will listen and do what you promised as you were voted in.

Help us get back our America and protect our beautiful state of Mississippi.

Thank you for your time,

Dana Merrill

Subject: Reef Fish Amendment 28

Date: Friday, June 6, 2014 at 2:42:39 PM Eastern Daylight Time

From: Butch Stivers

To: Gulf Council

Jun 6, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Butch Stivers

P.S. Hey, just so you are up to date with the times, nobody goes fishing anymore except rich old men and commercial fisherman -- we do not need recreational red snapper -- just another needless waste of time and resources on behalf of the dumb corrupt government. You would think that you would get tired of being so predictable, but apparently not. Politicians and the government are the worst joke on the earth.

Don't you have toxic radioactive waste to dump into water tables under your own state and your own people so you and your brain-less business friend can make billions of dollars by gaming the system and then "retiring"? Perry, you are a disgrace and you never should have been born -- your parents never should of been born, your entire bloodlines shouldn't exist -- just like bush, cheney, and all the other wretched evil cretin scum who ruin this existence by existing.

I hope people throw dead fish at you, I hate you and every other politicians guts.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 6, 2014 at 11:57:15 AM Eastern Daylight Time

From: Bridget Haxho

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Tanya Tweeton

To: Gulf Council

Dear Governor and Gulf Council Members:

I really miss having Red Snapper on the menus to choose whenever I have wanted, remembering the "good ole days" when we down here could have it at any time and there was no problem with quantities. So please don't mess with the situation cutting me out of the consumer market. It is the only fish I really love outside of mahi-mahi. The restaurants, the chefs and me need to be treated equally by making sure that they and I will have access to that great Red Snapper when I go out to eat. I am a long time Floridian I can't believe that some tourist from Timbuktoo will have more access than I can as a long time resident. Please have consideration for your constituents and don't leave us depressed at the changed situation!! Please don't ignore me! I live here I deserve to be listened to!

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 6, 2014 at 10:02:09 AM Eastern Daylight Time

From: Zoann Priesmeyer

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 6, 2014 at 12:31:02 AM Eastern Daylight Time

From: Edward Palkovic

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Mark Lebel

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 4:51:44 PM Eastern Daylight Time

From: Julie Lee

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

also by implementing this amendment not only will it hurt the local business; it also will directly impact consumers. Obviously since the supply would be decreased due to supply and demand the price will increase which in the end impacts both consumers and businesses. To have a food source increase simply for recreational purposes is ridiculous; basically we are saying sure, we as consumers are willing to pay increased prices for red snapper so people can go and have fun recreational fishing. By doing this, not only will prices be increased on the red snapper, naturally suppliers will have to increase prices to restaurants/stores to make up for the amount that is being caught to sell, consumers will then naturally be paying increased prices for other foods to make up for the profit margin that is being lost due to the inflation. Which then people may stop visiting restaurants so in order to make up for loss in sales other food prices will be increased to make up for the loss. One change can alter the entire economy it is like a domino effect that keeps going around and around but in a negative manner. By spending more for seafood that decreases disposable income to spend elsewhere so the economy can be affected simply due to this one factor for recreational purposes.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Thursday, June 5, 2014 at 3:00:41 PM Eastern Daylight Time
From: Pete Umbdenstock
To: Gulf Council
Category: AP-Habitat MS/LA, Recreational

Dear Governor and Gulf Council Members:

I'm sick and tired of the bellyaching of a handful of commercial poachers who have enjoyed a disproportionate share of the snapper fishery for years. NMFS gave (as in free) them ownership of a public resource and now they want to claim ownership of any increase in allowable catch.

Greed, Greed, Greed

Please support passage and implementation of amendment 28.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 1:02:10 PM Eastern Daylight Time

From: Vanessa Brown

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Friday, May 30, 2014 at 2:52:27 PM Eastern Daylight Time

From: John Arsenault

To: Gulf Council

May 30, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. John Arsenault

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 10:54:13 AM Eastern Daylight Time

From: Janet L. Haselow

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

SUPPORT AMENDMENT 28

"Amendment 28" would NOT hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a TRUE promise to recreational fishermen who WILL experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is NOT divisive OR unfair and comes at a time when demand for local and sustainable seafood is at an all-time high among struggling families who can't afford to buy from local fisheries due to financial strains in our economy.

Please SUPPORT Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that assist only the seafood industry.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 9:29:45 AM Eastern Daylight Time

From: Mary Pearson

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 8:53:41 AM Eastern Daylight Time

From: Joan Hutton

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 5, 2014 at 8:16:14 AM Eastern Daylight Time

From: Oleksandr levtukhov

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Wednesday, June 4, 2014 at 11:04:13 PM Eastern Daylight Time

From: Katherine Sanoja

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Wednesday, June 4, 2014 at 10:41:49 PM Eastern Daylight Time

From: Steven Gaber

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

I believe there should be a temporary moratorium on several key species, including red snapper, grouper and snook.

Similar moratoria were imposed on rockfish (striped bass) in the Chesapeake Bay, with considerable success. Fishermen were initially unhappy, but pleased when the striped bass population rebounded in a few years.

Please oppose Amendment 28 and focus on real solutions for recreational and commercial fishermen that will actually extend seasons for anglers over the long-term.

Any change in the current allocation of red snapper would be bad for consumers and businesses across the Gulf of Mexico.

Date: Wednesday, June 4, 2014 at 9:50:05 PM Eastern Daylight Time

From: Candace Volz

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

So much progress has been made in the last few years in building Gulf red snapper populations. Please don't let this progress go to waste. It's so very important that we monitor snapper and other over-fished populations to keep the Gulf healthy. All it takes is one Deep Horizon to tip the Gulf into crisis. I'm a tax payer, I eat fish, and I'm worried about our oceans and waterways.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: dolores James

To: Gulf Council

Dear Governor and Gulf Council Members:

I realize this is a form letter for the most part but this first part is me. Having been raised and lived on one coast or the other I often fished with my Uncle who was a commercial fisherman in the Gulf off Florida. That was years ago I admit but things haven't changed. The small businesses and families of the commercial fishermen in the Gulf WILL be hurt by this. Let the "pleasure" fishermen continue to have to find the schools just like the commercial fishermen do. I am one of those who believe we are being overloaded with rules that don't help anyone.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, June 4, 2014 at 3:32:54 PM Eastern Daylight Time
From: German Taveras
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Ann Harlan

To: Gulf Council

Dear Governor and Gulf Council Members:

I am writing in opposition to Amendment 28. If I had the time and means to go recreational fishing and enjoy my catch, I would. But I don't. I do, however, have a family to feed. I try to provide locally sourced, healthy food but rely upon commercial fishers to get the fish to the supermarket so I can purchase it. This feeds my family and supports local business. I do not have any idea why I should sacrifice food from my table or pay a higher price so that recreational fishers can have their fun.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

The Gulf of Mexico belongs to all of us. I spent my summers as a young child fishing along the Mississippi Gulf Coast, and also spent time with family and friends on an occasional deep-sea fishing trip off Louisiana's Gulf Coast. There is room for both recreational fishing and commercial fishing, but this amendment isn't the answer, especially since it damages commercial fisheries, in the name of "saving" recreational fisheries' allocations of red snapper.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

Hey Rob I have been snapper fishing for 35 years. We would come to Gulf Shores to fish at least four times a year. With the limited number of fishing days we don't go to Gulf Shores at all.

The state of Alabama needs to manage the snapper. We the people of Alabama have built the reefs not the federal Fishery Mangers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, May 30, 2014 at 6:50:32 PM Eastern Daylight Time

From: William Cowherd

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Ann Graham

To: Gulf Council

Dear Governor and Gulf Council Members:

Broiled Red snapper is my favorite. We used to go to Strickland's in Atlantic Beach across the inlet from Mayport. They always had fresh red snapper in the seafood display out front, along with the other catches of the day. I think the restaurant is long gone, and I never see red snapper on the menu at seafood places anymore. Please veto Amendment 28!

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

There is no shortage of red snapper and much of the hype is based on false science (as evidenced in the Atlantic Snapper closures). Please stop trying to fix something that is not broken and focus on bigger problems! Families who fish for a living have had their lively hood eroded by the Government steadily for years, and for many it is the only living they know. Don't take away their only opportunity to contribute economically to society.

Thank you.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Janet Norris

To: Gulf Council

May 29, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Friday, May 23, 2014 at 6:58:19 AM Eastern Daylight Time

From: William Yates

To: Gulf Council

May 23, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. William Yates

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, May 23, 2014 at 11:25:17 PM Eastern Daylight Time

From: Rick Palacios

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, May 23, 2014 at 2:14:52 PM Eastern Daylight Time

From: Sean Armstrong

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen which will actually extend seasons for anglers over the long-term instead of harmful schemes to the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, May 23, 2014 at 9:20:52 AM Eastern Daylight Time

From: gina lucas

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 10:08:40 PM Eastern Daylight Time

From: Betty Saenz

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Thursday, May 22, 2014 at 6:27:40 PM Eastern Daylight Time

From: Feipe Cruz

To: Gulf Council

May 22, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Feipe Cruz

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 5:57:23 PM Eastern Daylight Time

From: Deborah Finkbeiner

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Thursday, May 22, 2014 at 4:57:59 PM Eastern Daylight Time

From: Gary Murata

To: Gulf Council

May 22, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Gary Murata

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 2:14:21 PM Eastern Daylight Time

From: Margaret Winecoff

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Please consider taking amendment 28 off the ballot, as a Floridian yourself, we rely on our water to feed, clothe and provide for our families. Over fishing our waters will lead us into a crisis, like oil. We must be able to reproduce for next year! The Gulf coast has been through enough suffering this decade. Lets keep the red snappers where they belong, and the tourists will want to charter these commercial, family owned and operated businesses.isn't that the American dream? Isn't that Florida's goal to have loyal visitors? Gov. Scott, we've actually met before when you traveled to Eglin/ northwest Florida regional airport. I voted for you. Lets keep our waters bountiful and clean, because no place on Earth can match the Gulf Coast.

I would like to thank you in advance, for your time. And I certainly hope some more thought and research is done on the subject. "Make the Best of What's Around"

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

My grandpa was a commercial fisherman on Catahoula Lake and I have friends that are commercial fisherman in Pierre Part. This Amendment 28 is a slap in the face to them.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 10:15:15 AM Eastern Daylight Time

From: Joan Matteson

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

The Amendment 28 is simply another way to force people off of the Gulf of Mexico. Fewer people that are on the Gulf will make drilling for oil easier for the Oil Industry. This has nothing to do with the fishing industry Governor Scott, and you know it! Fewer eyes on the Gulf of Mexico will make for fewer witness on the water. I am sure the Koch Brothers have a hand involved in this effort.

PS

Personally I come from Louisiana and I know for a fact that getting rid of any industry is devastating to its economy. If you do get rid of one side of the seafood industry then I'm sure no one will want to buy anything from the Floridian people due to its lack of diversity. If you really want to get rid of this, then you've already lost a ton of what we already pay you in taxes each year. Not only that but you'll have a lot of angry fishermen breathing down your neck. Each to his own decision. I still don't mind pointing out how many things can go wrong with a poor leadership decision like this.

Forever a concerned and patriotic citizen,

Peter Francis W.

Dear Governor Perry and Gulf Council Members:

PLEASE OPPOSE AMENDMENT 28!

"Amendment 28" will be devastating to all cities and towns along the gulf coast. It will severely hurt small businesses and families that rely on this type of fishing to feed their families and the community.

Many tourist that visit theses coastal towns look forward to the fresh seafood from the Gulf of Mexico and knowing that it was caught fresh! By cutting nearly half a million pounds of popular red snapper from the consumer market in 2015, you are hurting fellow Texans as fishermen and families.

Keep the Texas Gulf Coast prosperous and let the fishermen feed their families!!

PLEASE OPPOSE AMENDMENT 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Thank you.

A proud Texan who loves the Gulf Coast!

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 8:34:20 AM Eastern Daylight Time

From: Celeste LaRocca

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

We need your help, Rick. Please help our Gulf industry

Stay Alive and provide our Seafood to our grocery merchants. Please help!

Kindest regards,
Celeste LaRocca

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, May 22, 2014 at 2:14:16 AM Eastern Daylight Time

From: Joshua Elliott

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council
Category: Charterboat, AP-Red Snapper

Dear Governor and Gulf Council Members:

The form letter from Share the Gulf and its few members is a sham. The few members they have are the owners of 90% of the Red Snapper and grouper in the Gulf and though given millions of dollars of a public resource (our fish) they want more. It is a scam paid for by the EDF.

Amendment 28" will help the many small charter boat businesses, families, and communities along the Gulf coast by reallocating the red snapper fishery to the recreational sector. Many commercial red snapper IFQ owners want to keep the consumer market at a high price per pound and want to be able to lease red snapper to the recreational anglers for additional profit. These same commercial fishermen have claimed that once their allocation reached 5 million pounds that was the level where their profit margin selling to the consumer is highest as any additional poundage would drive the consumer price down.

"Amendment 28" provides a real mechanism to properly reallocate the red snapper fishery for the best social and economic benefit to the nation.

This "reallocation" proposal is more than fair and comes at a time when demand for recreational fishing opportunities is at an all-time high.

Please support Alternative 5 of Amendment 28 and support real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Category: Charterboat, AP-Reef Fish, AP-CMP

Dear Governor and Gulf Council Members:

"Amendment 28" will help the many small charter boat businesses, families, and communities along the Gulf coast by reallocating the red snapper fishery to the recreational sector. Many commercial red snapper IFQ owners want to keep the consumer market at a high price per pound and want to be able to lease red snapper to the recreational anglers for additional profit. These same commercial fishermen have claimed that once their allocation reached 5 million pounds that was the level where they profit margin selling to the consumer is highest as any additional poundage would drive the consumer price down.

"Amendment 28" provides a real mechanism to properly reallocate the red snapper fishery for the best social and economic benefit to the nation.

This "reallocation" proposal is more than fair and comes at a time when demand for recreational fishing opportunities is at an all-time high.

Please support Alternative 5 of Amendment 28 and support real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, May 20, 2014 at 8:30:47 PM Eastern Daylight Time

From: Christie Ryan

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, May 20, 2014 at 4:35:36 PM Eastern Daylight Time

From: Susan Williamson

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Why do we need to change a policy that's not broken. There has got to be a better answer than robbing families that fish for their livelihood.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, May 20, 2014 at 12:20:16 PM Eastern Daylight Time

From: Bobbie Narramore

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Nessa Ruiz

To: Gulf Council

Dear Governor and Gulf Council Members:

Our State needs all the sustainable resources we can keep in this uncertain time of our economy. Oil spills have compromised a great deal of our wildlife and resources along the Gulf Coast. Families who rely on the sustainability of the Gulf Coast resources have suffered enough! We want our farms to stay in our market without "Big Farm" regulations forcing pesticides and unsustainable resources on them. Restaurants and grocers are looking for LOCAL, organic products because our consumers are DEMANDING quality foods that keep us all healthy, our economy's health included.

Louisiana IS the Sportsman's Paradise, and will remain so even when you oppose "Amendment 28."

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, May 20, 2014 at 10:28:43 AM Eastern Daylight Time

From: Diana Westover

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers

Dear Governor and Gulf Council Members:

how can you support commercial fishing, what a scam about big politics and money!! , i accidentally send in my name as supporting when i did not mean to so you can remove, i said remove my name supporting any commercial red snapper fishing!! if red snappers are so endangered why is any commercial fishing even allowed??? you need to make red snapper a game fish and put a stop on the commercial harvest of red snapper!!!

From: DeeAnn LaRue

To: Gulf Council

Dear Governor Perry and Gulf Council Members:

We live in Houston and don't have the opportunity to go fish in the Gulf as we would like. If this amendment passes we will have no access to red snapper. Texas is about offering choices in where we live and work and what we eat. This is good for the restaurant industry as well where my Husband works. They need to have something else to offer with the price of all other meats going up.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

When recreational fishermen are hurting our food production it's time to limit their numbers.
