Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor Jindal,

Im writing to you in hopes that you would oppose any reallocation plans. Sir, I grew up in Louisiana and can recall memories of family vacations where we would go to our camp and fish the entire time. It kept our family close. My grandfather and his family made trawling nets for a living, and sold freshly caught seafood.

After 25yrs in the Air Force, I moved back home. Things have certainly changed. Because of limitations on fishing, buying local fresh seafood is way too expensive and sometimes unavailable. I shouldn't have to buy frozen bags of Tilapia from China because it's cheaper. This is hurting our local economy and putting local businesses and fishermen out of business.

I've traveled around the world but chose to come back here because I love our culture, our food and our Gulf.

Thank you for taking time to read my letter.

Sincerely,

Teresa Sanchez

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

As a former resident of the gulf coast prior to Katrina, I have a passion for the gulf and its beauty and bounty. Between Katrina bp oil spill and other environmental hazards we have to be good stewards. Redfish and deep sea fishing is one of best tourist attractions. Your protection is needed.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Kevin Anson, Chair
Gulf of Mexico Fishery Management Council
2203 N. Lois Avenue
Suite 1100
Tampa, Florida 33607 USA

RE: Ocean Conservancy's Written Comments for the Gulf of Mexico Fishery Management Council's October 2014 Meeting in Mobile, Alabama

Dear Chairman Anson,

The Ocean Conservancy¹ submits to the Gulf of Mexico Fishery Management Council the following comments on issues that are listed on the agenda for the upcoming meeting in Mobile, Alabama. In summary our comments and recommendations are as follows:

- 1.) **Greater Amberjack Action is Needed:** The Council must act immediately to implement a new rebuilding plan for greater amberjack, which remains overfished and is undergoing overfishing despite a failed rebuilding plan that terminated in 2013.
- 2.) **Consideration of Gag Grouper Ecosystem Factors Commendable:** The Council should be commended for working with the SSC to consider ecosystem factors in developing management strategies, as they did in considering the ongoing red tide event in relation to gag grouper.
- 3.) **Approve Sector Separation:** The Council should pass Amendment 40 Sector Separation as this strategy will have strong conservation benefits for the recreational red snapper fishery and will increase predictability of seasons and access for fishermen from both components of the recreational fishery.
- 4.) **Continue to Improve Data Collection:** Council should advocate for continued Marine Recreational Information Program (MRIP) calibration, investigate the results of the Percentage Standard Error workshop, and work to improve fishery dependent data collection from the recreational fishery sector.
- 5.) **Formal Request for NOAA RESTORE Act Presentation:** Council should formally request that NOAA give it a presentation on the status of the RESTORE Act

The recommendations above are discussed in greater detail in the corresponding sections below.

¹ Ocean Conservancy, a non-profit organization with over 120,000 members, educates and empowers citizens to take action on behalf of the ocean. From the Arctic to the Gulf of Mexico to the halls of Congress, Ocean Conservancy brings people together to find solutions for our water planet. Informed by science, our work guides policy and engages people in protecting the ocean and its wildlife for future generations.

1. Greater Amberjack Rebuilding Plan Needed

As the Council considers proposed modifications to Annual Catch Limits (ACLs) And Annual Catch Targets (ACTs) for greater amberjack it is imperative that the Council also undertakes a thorough examination of the recent failed rebuilding plan for this stock, and **it is essential that the Council acts immediately to end overfishing and to develop a new rebuilding plan for greater amberjack.**

Amberjack was declared overfished in 2000 and was placed under a rebuilding plan starting in 2003, with a rebuilding target of 2012. The rebuilding plan failed, and as of the 2014 SEDAR 33 assessment the stock remains overfished and is still undergoing overfishing.² Amberjack is one of only eight stocks across the nation that showed less than a 25% increase in biomass throughout the course of its rebuilding plan, indicating a troublesome lack of rebuilding progress.³ The Magnuson-Stevens Fishery Conservation and Management Act (MSA) demands stocks designated as overfished are subject to a rebuilding plan. Furthermore, the MSA also demands that for stocks designated as undergoing overfishing the Council must take actions that end overfishing immediately and that such actions must work to rebuild affected stocks.⁴ The third quarter *Status of the Stocks* released by the National Marine Fisheries Service (NMFS) for 2014 indicates that Gulf of Mexico greater amberjack is still undergoing overfishing, and it is clear that management strategies applied to this stock over the past 14 years have been ineffective at alleviating this status or at rebuilding the stock.^{5,6,7} The Council must act immediately to end greater amberjack's overfishing status by implementing aggressive management tactics for the stock.

For overfished species such as amberjack, the stock must be rebuilt within 10 years or sooner.^{8,9} In the event a rebuilding plan runs its course and the stock is still determined to be overfished, the fishing mortality rate may not be increased and a remedial fishing rate must be selected.¹⁰

This remedial fishing rate must be the **lesser of either** 75% of Maximum Fishing Mortality Threshold (MFMT), which in the case of amberjack would amount to 75% of F_{MSY} (F_{PROXY} standing in for F_{MSY} at $F_{30\%SPR}$), **or** $F_{REBUILD}$.¹¹ $F_{REBUILD}$ can only be determined when Council provides a rebuilding timeframe for the stock, and the Council has not established a new rebuilding timeline.¹²

Presently Council is considering its Scientific and Statistical Committee's (SSC) recommendations for amberjack that are based on the default remedial rate of 75% of MFMT, however it is critical to note that the SSC was only able to make recommendations on 75% of MFMT as $F_{REBUILD}$ cannot be ascertained without Council action setting a rebuilding timeframe. Therefore, it is essential that Council act immediately to develop a rebuilding plan that establishes a rebuilding timeframe so that $F_{REBUILD}$

may be properly calculated and the Council can accordingly select from the lesser of either 75% of MFMT or $F_{REBUILD}$.

In developing its rebuilding plan Council should assess and take into account the reasons why the previous rebuilding plan failed. Specific management measures to achieve target fishing mortality rates should be chosen based on the rebuilding failure analysis. The Council should act in conformity with the findings, purpose, and policy of the MSA that mandate sustainability in and conservation of US fisheries by developing a new rebuilding plan that assures meaningful rebuilding progress for greater amberjack in the Gulf.¹³

2. Consideration of Gag Grouper Ecosystem Factors Commendable

The Ocean Conservancy is pleased that the Council, through its SSC, undertook a detailed analysis of the recent red tide event in the Eastern Gulf and the potential impacts that this event may have on gag grouper stocks. Taking into account natural mortality attributable to events such as these is of critical importance to examining the ecosystem as a whole. This type of analysis will remain invaluable as the ecosystem based approach continues to gain traction in fisheries management.

Natural fish mortality can be affected a number of factors including predator/prey and environmental factors beyond the recent red tide event. Additional factors may include the effects of hypoxic zones, changes in water temperature and changes in rainfall attributable to climate change, oil spills, and changes in habitat due to a changing environment. By better estimating natural fish mortality through careful analysis of these acute and prolonged environmental impacts we can more accurately manage our stocks and safely maximize future yields.

Accordingly, we applaud the Council in working with its SSC to consider the red tide event and recommend the Council to continue the consideration of these environmental factors as it manages all stocks.

3. Approve Sector Separation

The Ocean Conservancy strongly recommends that the Council votes to approve Amendment 40, sector separation of the recreational red snapper fishery. Sector separation will allow fisheries managers to develop finely tuned management tools that cater to the unique needs of the individual private and for-hire sectors that fish for red snapper. The end result benefits both the fishery and the coastal communities that so rely on recreational fishermen to support their tourism and boating based economies. Amendment 40 will lead to better predictability in fishing seasons, and will likely eliminate that perennial overruns that place the continued stability and health and stock in jeopardy.

When the individual needs of the recreational sectors are addressed and treated independently, the stock can be managed with the strongest conservation benefits. This action will reduce the likelihood of quota overages while ensuring angling opportunity for both sectors.

Sector separation has been a highly contentious issue for stakeholders around the Gulf; however, from a conservation perspective the issue is meaningful and important to citizen stakeholders across the United States. The Ocean Conservancy is a membership- based organization numbering over 120,000 concerned individuals, and because these citizens come from all over the country, it is not often possible for them to relate their conservation concerns to Council. Furthermore, many of our members are from the non-boat owning public and rely on charter boats to access the Gulf's many fisheries resources, including red snapper. The Ocean Conservancy seeks to give these individuals a meaningful voice in fisheries management affairs in the Gulf of Mexico and elsewhere.

As such, on behalf of its broad countrywide membership, the Ocean Conservancy strongly supports sector separation for the conservation benefits it will provide the red snapper in the Gulf of Mexico and encourage the Council to vote in favor of Amendment 40 when it meets in Mobile. Acting this October provides the only real likelihood that the conservation, recreational, and economic benefits of sector separation will be applicable to the upcoming 2015 red snapper season. Even more, the Council should act swiftly to approve sector separation so that true progress can be made in achieving the ultimate and

¹³ 16 U.S.C. §1801(a)-(c).

overarching objective of reducing further quota overruns that jeopardize red snapper rebuilding effort as soon as possible.

4. Continue to Improve Data Collection

The Council should continue to press the importance of and need for calibration of Marine Recreational Information Program (MRIP) estimates for stock assessments and management measures. Calibration of current MRIP to past MRIP estimates is essential to meeting conservation goals and securing long term health of Gulf fisheries. Ratio estimators will provide an expedient method to approach calibration issues; however, they are not a long term solution to the issue at hand. The Council should consider the trade-offs of short term vs long term calibration methods and set the SEDAR schedule appropriately.

Additionally, the Council should instruct the SSC to investigate the findings of the recent Atlantic Coastal Cooperative Statistics Program and MRIP workshop on Percent Standard Error (PSE).¹⁴ The results of this workshop will serve to inform stock assessment procedures, the SSC and the Council of how to better view data that originates from MRIP.

As always, the Ocean Conservancy would like to encourage the Council to work with NMFS to expand on recreational fishery dependent data collection methods for offshore fisheries (snapper, grouper, etc.), potentially through dedicated Deepwater Horizon restoration priorities that center on fishery data collection.

5. Formal Request for NOAA RESTORE Act Presentation

The finalization of treasury regulations governing spending of RESTORE Act funds means that ecosystem restoration efforts can finally begin in earnest. Restoration programs like the Science, Observation, Monitoring and Technology Program (Section 1604 Science Program) and the Gulf Coast Ecosystem Restoration Council's comprehensive ecosystem recovery plan offer a long-overdue opportunity to invest in recovery of marine species like Council managed reef and coastal migratory pelagic fishes.

We encourage you to continue to provide input to NOAA and other agencies on the science, technology, and management elements necessary for Gulf of Mexico fishery restoration. We urge you provide comments on NOAA's strategic vision and restoration plans for these important resources so that Gulf fisheries may be included in restoration plans.

As such, the Ocean Conservancy recommends that the Council should formally request that NOAA present to the Council an update on the agency's plans to restore offshore resources in the Gulf across the different funding pots provided by the RESTORE Act.

Thank you for consideration of our comments and should you have any questions or concerns please contact the undersigned.

Sincerely,

Share the Gulf Co-Chair Letter on Amendment 28

From: Jim Gossen [<mailto:jgossen@louisianafoods.com>]**Sent:** Thursday, October 16, 2014 11:34 AM**To:** Kevin Anson**Cc:** David Walker; Pamella Dana PhD; John Greene Jr.; pamdana@yahoo.com; Roy Williams; Martha Bademan; jmsanchez22@aol.com; Douglass Boyd; Robin Riechers; Greg Stunz; Leann Bosarge; Corky Perret; Dale Diaz; Campo Matens; Myron Fischer; Harlon Pearce; Roy Crabtree; Doug Gregory; Andy Strelcheck; Steve Branstetter; Phil Steele; Mara Levy; Carrie Simmons; Assane Diagne; Steven Atran; Emily Muehlstein; Ava Lasseeter; Carter.Smith@tpwd.texas.gov; sp@mdwfp.state.ms.us; Jamie Miller; Randy Pausina; dcnr.commissioner@dcnr.alabama.gov; Chris Blankenship; Nick Wiley; brivard@harrisonrivard.com**Subject:** Share the Gulf Co-Chair Letter on Amendment 28

Dear Chairman Anson,

On behalf of the Share the Gulf (STG) coalition, I am writing to express our continued opposition to Amendment 28, a proposal to reallocate red snapper away from consumers and into the recreational fishing sector. At the June 2014 Gulf of Mexico Fishery Management Council meeting, the Council approved a motion to postpone further consideration of this proposal until improvements to recreational management were made. Despite the fact that recreational management improvements are far from secured, the Council has added consideration of Amendment 28 to its meeting agenda for next week in Mobile. We continue to believe there is no economic justification for this amendment and that it distracts from addressing the real challenges facing our shared resource.

Since the June Council meeting, the Council's own Socioeconomic Scientific and Statistical Committee (SESSC) has also weighed in. At their August 5, 2014 meeting they unanimously agreed that instead of reallocating red snapper to the recreational fishery, the Council should focus on finding management solutions that could improve fishing opportunities for recreational fishermen. They also suggested that the Council examine carefully whether any reallocation might impact the likelihood of overharvesting in the recreational sector. We remind the Council that our 30,000 members agree strongly with the advice of the SESSC.

The Council is considering a variety of proposals at this meeting that may be able to increase flexibility and access for recreational fishermen and the charter for-hire industry. STG encourages the Council to move forward with recreational management solutions that ensure that the fishery can provide enough fish for everyone.

Should the Council resume work on Amendment 28, we encourage them to follow the very clear advice from SESSC and STG members and change preferred alternative to 1 “no action.” Attached, please find a letter signed by our coalition co-chairs, that we originally submitted to the Council in June 2014.

Sincerely,

Jim Gossen

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Saturday, October 4, 2014 at 10:19:30 AM Eastern Daylight Time
From: Jeff Sharnowski
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Tuesday, September 9, 2014 at 10:10:29 AM Eastern Daylight Time

From: JOHN LEACH

To: Gulf Council

Sep 9, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

From: Nic Mostert

To: Gulf Council

Sep 5, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Thursday, September 4, 2014 at 8:26:37 PM Eastern Daylight Time
From: Addie Lucas
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Date: Thursday, September 4, 2014 at 8:26:37 PM Eastern Daylight Time
From: Addie Lucas
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Donald Clark

Dear Governor and Gulf Council Members:

Please check out the link I have provided, contrary to what is being preached by the commercial fishing industry the recreational fisherman are being forced out and it is only getting worse, Amendment 28 needs to go through and the Coastal States need to take control of the fisheries or else it will cost each State a lot of money in the long run.

Preserve our heritage before it is gone.

The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

As an individual who owns a boat for my own personal enjoyment as well as my families, I am very much in support of recreational fisherman receiving a larger portion of the quota. I understand the commercial sector must make a living, but it shouldn't be at us recreational fishers expense.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

The recreational sector should be allocated more than the commercial sector. Also monitor this by issuing red snapper tags when you purchase fishing license. These will only be valid for the licensee. Charge so much per tag up to ten tags per license. Send tags back for tracking.

Subject: Current Red Snapper Amendments & Regulations

Date: Friday, August 1, 2014 at 4:54:45 PM Eastern Daylight Time

From: David

To: Gulf Council

I have read and watched the videos related to the current considerations for red snapper amendments and regulations.

As a recreational angler I can only state that all your proposals, etc. are not based on actual tonnage of red snapper caught in the recreational sector. I cannot speak for the commercial fishermen but I suspect that this also applies to that sector as well.

With so much at stake for all fishermen I beg you to please put a system in place that takes into consideration the ACTUAL NUMBER OF TONS of red snapper caught by both sectors. There has to be a way to do this. As it stands now all the premises that you are now using for your regulations and controls have no true basis at all. If you do not verify the amount of tons actually caught then everything that you do in this respect is only hypothetical.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, July 31, 2014 at 7:39:47 PM Eastern Daylight Time

From: bryan caraway

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Donald Shafar

To: Gulf Council

Jul 30, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. To Whom it May Concern,

The restrictions on Red Snapper Fishing in the Gulf of Mexico that continue to be placed upon Recreation Fishing is are poorly thought out decisions. There are more Red Snapper on the reefs off of Alabama waters than there has ever been. I have been fishing in the Gulf for 40 years and I have never seen the population of reef fish this abundant. Stop this nonsense and open our waters to the people for which it belongs to.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 28, 2014 at 12:19:51 PM Eastern Daylight Time

From: Brian Vickers

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, July 24, 2014 at 1:54:35 PM Eastern Daylight Time

From: James Moore

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

James Moore

From: Robert Rizzuti

To: Gulf Council

Jul 16, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

From: annia menendez

To: Gulf Council

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Any attempts at bottom fishing for other species in the Gulf of Mexico are impossible (or a huge waste of time) due to the huge number of red snapper currently occupying the Gulf waters out 70 - 100 miles. You need to focus your efforts on commercial fishing and stop this ridiculous exertion of governmental power over the folks who spend millions every year, with no scientific support whatsoever for the ridiculously restricted limits.

Thank you for your consideration.

July 3, 2014

Mr. Doug Boyd, Chair
Gulf of Mexico Fishery Management Council
2203 North Lois Ave.
Tampa, FL 33607

Dear Mr. Boyd:

The Charter Fisherman's Association would like to applaud the Gulf Council for moving forward with Amendment 40, assembling a charter for hire Individual Fishing Quota (IFQ) Advisory Panel (AP), and halting discussions on Amendment 28. The actions taken during the June 2014 council meeting in Key West, Florida provide recreational and commercial fishermen across the gulf with the opportunity to enjoy more flexibility, accountability, and predictability in the near future. We wanted to not only offer our support to the Council on these actions, but also some ideas about what to do next.

Pass and implement Amendment 40. Moving forward, Amendment 40 will provide the foundation for improving management within the private recreational and charter for hire segments of the current recreational fishery. By operating under their own allocations, each segment of the fishery will have the ability to develop management strategies that fit the needs of its fishermen.

Reconsider the membership of the newly selected Charter for Hire IFQ Advisory Panel, and limit it to federally-permitted charter captains. As we outlined in our June 18, 2014 letter to the Council, CFA believes that a charter for hire IFQ is the right management solutions for our industry - one that provides us with the flexibility we need for successful businesses as well as accountability to prevent future overages that harm the fishery. As a CFH organization, we are concerned that private angling representatives are directly involved in developing the possible future management system of the charter for hire industry. During the selection of the Recreational Data Collection AP, charter for hire fishermen were passed over because they did not represent the private recreational angling interest the council was looking to gather with the AP. Understanding that the current recreational fishery is comprised of charter for hire and private angling segments; it stands to reason that if the council were looking to develop a successful Charter For Hire Advisory Panel, then private angling interest would be relatively minimal. It is

peculiar to expect solid recommendations to the council for an IFQ program from known opponents of our industry with minimal knowledge in the development of IFQ programs.

Considering the serious issues facing the entire recreational fishery, it is admirable to see the council shifting focus to addressing the underlying problems rather than the symptoms of problems facing fishermen. This shift in discussions by the council should free up time to discuss and develop much more meaningful long term solutions. Our organization looks forward to working with the council and the agency to develop meaningful long term solutions that benefit the resource as well as the fishermen. Sincerely,

Shane Cantrell

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 14, 2014 at 10:12:29 AM Eastern Daylight Time

From: Susan Hall

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Susan Hall
3923 Easy Street
Panama City, FL 32409

Subject: Thank you for focusing on real solutions

Date: Sunday, July 13, 2014 at 3:18:22 AM Eastern Daylight Time

From: Mark Klugiewicz

To: Gulf Council

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

At the heart of this is the question, why should our precious seafood resource be handed over to a select few commercial interests? The answer, of course, is IT SHOULDN'T!!

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

To Whom It May Concern:

I oppose red snapper reallocation through Reef Fish Amendment 28. Status Quo (No Action) is the only alternative I can support.

- Commercial fishermen have stayed within their annual catch limit every year while recreational fishermen have exceeded theirs in 6 of the last 7 years.
- Commercial fishermen have worked hard to promote conservation in order to help the red snapper population recover. Reallocation does not promote conservation and may actually hurt the red snapper population.
- Reallocation will not solve the problems of the recreational fishery and, in fact, will only make them worse. Reallocation will hurt commercial fishermen and take red snapper off the plates of the American consumer.

It's time the Council followed the law and gave recreational fishermen the right tools to manage their fishery properly. Taking quota away from commercial fishermen is not a solution. Thank you for the opportunity to comment.

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. carl anderson

Subject: Overwhelming majority ignored?

Date: Saturday, July 5, 2014 at 8:38:32 AM Eastern Daylight Time

From: david fulper

To: John Greene Jr., Douglass Boyd, commissioners@myfwc.com, Roy Crabtree, Gulf Council

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

--

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Red Snapper Populations Off Louisiana Coast

Date: Thursday, July 3, 2014 at 9:10:47 PM Eastern Daylight Time

From: Andrew Meche

To: Gulf Council

On which red snapper population studies does this council base their findings? Does the council only consider natural structures in population studies(ex. Flower gardens vs oil platforms)? If so, how do you justify these studies? Are commercial fisherman only allowed to fish areas considered acceptable for population studies? Does the council acknowledge the fishing off the Louisiana coast is magnitudes better than any other state? Is this council ignorant to the actual red snapper populations or is it neglectful of the facts based on a alternative motive such as catering to a few individuals?

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, July 3, 2014 at 8:44:02 PM Eastern Daylight Time

From: John Caro

To: Gulf Council

Dear Governor and Gulf Council Members:

As a former commercial fisherman and longline boat owner I have seen the damage that overfishing does to the fishery. I suggest a new method of conservation. Break the gulf up into twenty mile wide strips, close half to all fishing until it has recovered and then open it while closing the other half. In this way you would guarantee a healthy fishery while dispensing with all the complicated laws and regulations now in effect.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

Jul 3, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Richard Hoskins

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, July 3, 2014 at 2:27:21 PM Eastern Daylight Time

From: Lori Buckler

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Date: Thursday, July 3, 2014 at 1:26:20 PM Eastern Daylight Time

From: Susan Smith

To: Gulf Council

Jul 3, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mrs. Susan Smith

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Thursday, July 3, 2014 at 12:25:20 PM Eastern Daylight Time
From: christine schaffer
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

These fish are a precious resource. TAKE CARE OF THEM.

Subject: Reef Fish Amendment 28

Date: Monday, June 30, 2014 at 6:19:39 PM Eastern Daylight Time

From: Carl Figini

To: Gulf Council

Jun 30, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Carl Figini

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

To: Gulf Council

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

From: Corinne Clay
To: Gulf Council

Dear Gulf Council:

Thank you for your action on Amendment 28 to work on favorable outcomes or solutions to the problems facing recreational fishermen. Please stop work on Amendment 28 permanently and stay focus on plenty of ideas to assist recreational fishermen and consumers. We need long-term solutions to extend seasons for anglers instead of schemes causing the seafood industry and consumers harm. Personally seafood is a pleasure to my soul. Being born and raised in Louisiana, we cannot live without seafood. Let's not destroy the way of life for those especially fishermen, who have been committed to the seafood industry for centuries and hope centuries to come.

"Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change."

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future."

"This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high."

Thanks again for your wise decision to defer action on Amendment 28. I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Sincerely,

Corinne Clay

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

When the recreational industry threatens our ability to produce food, it's time to look at ways to limit recreational effort such as licensing and lotteries.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

From: Kirby Klys

To: Gulf Council

Dear Gulf Council Members.

Thank you for taking a pause on Amendment 28.

Please consider the overall economic impact for the vast majority of Americans who depend on the commercial fishermen to provide them with a meal. Does the average American own a cow? How many Americans eat meat? Same scenario. There has to be a huge multiplier effect of that one snapper from start to finish.

Sadly, commercial fishermen have long been a target in the eyes of the small percentage of people who actually do fish recreationally.

I have long proposed a first caught, first kept ability for the recreational fisher so that they can reduce discard mortality, have more fish to feed their family, and not reduce the commercial fisher's ability to supply "every one else" with American seafood.

Again thank you for the pause. I respectfully ask that this Amendment goes through with no change, or is taken off the table completely.

Sincerely,

Kirby Klys

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

From: Doreen Tetreault

To: Gulf Council

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

I'm 71 and my son and I are enjoying the Gulf as I never imagined. We have caught sails, wahoo, tuna, snappers, amber jacks, grouper and others. I may not have many more trips to enjoy, so your actions have enabled me to have experiences with my sons and grandson that I otherwise could not have had.

Thank you, very much. John Funk,

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

From: hilary capstick

To: Gulf Council

Dear Gulf Council:

As a member of Share the Gulf, I want to thank you for voting to defer action on Amendment 28 in favor of work on real solutions to the problems facing recreational fishermen.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

We ask that you permanently stop work on Amendment 28 and focus on more ideas that can help recreational fishermen. We all want solutions that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

- Amendment 28 is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.
- "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.
- This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

I appreciate your good work at the recent Council meeting, and look forward to seeing more progress on positive recreational management solutions.

I would like to know what the purpose of this bill would be? Who will it benefit? I find it very difficult to get any fresh red snapper at any restaurant as it is now. I can only imagine the difficulty I would have in obtaining this delicacy either in a restaurant or retail location if this bill should pass. I want to know who is behind the, what appears to be, absurd proposed legislation.

Subject: Reef Fish Amendment 28

Jun 25, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. CHARLES WIGHTMAN SR.

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

--

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

I am asking that you oppose Amendment 28. It is becoming more & to buy domestic seafood. I do not want to be forced to buy from Indonesia where waterway s are even more polluted than here in U.S.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

--

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

--

Subject: Red Snapper

Message: I work a 14&14 schedule in the oil and gas industry. This year I did not have the opportunity to fish for red snapper due to the 9 day season. The council should be ashamed of the poor job they have done. I fish snapper every year & I know there are more snapper than ever before.

How do you sleep at night???

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

To: Gulf Council
Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Reef Fish Amendment 28

Jun 23, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

I just returned from a fishing vacation to Venice, Louisiana where I expected to catch Yellowfin Tuna and Red Snapper and ship some delicious fish home. There were three of us on this trip and together we spent over \$7,000 on this trip. We were so upset. Not only were we not allowed to ship Red Snapper home, but we were not even allowed to fish for them for fun. To add insult to injury, wheel barrows full of Red Snapper were coming off those licensed to fish for these fish commercially. It was disgusting and the three of us have decided that unless the laws are changed we will NOT be fishing in the Gulf any more. We will NOT spend our hard-earned money for such a terrible experience.

Thank you for your consideration.

Sincerely,

Mr. Zac Grossman

Subject: red snapper

Please consider more red snapper days than 11. I fish out of cameron parish and we have to go 60 miles to get to the snapper grounds. With such a small window, there are days when the weather will not even allow us to go. The few days we got to go this year, the snapper were very, very abundant. A two snapper limit is achieved in a very short amount of time, everytime. I also hear from oil-field workers on rigs and platforms throughout the gulf region speaking of abundance of red-snapper that are never even fished. I personally have witnessed an abundance of red-snapper from gulf region area La –Fl.

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

To: Gulf Council
Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Destin Charter Boat Association position on Amendment 28
Attachments: amed28letter2.docx

Below is the body of the letter that is attached from the Destin Charter Boat Association. Thank you in advance for considering the view of the Destin Charter Boat Association.

Dear Members of the Gulf Council,

Recently the Destin Charter Boat Association's (DCBA) Board of Directions sent a letter to the Council opposing Reef Fish Amendment 28. There has been quite a few changes that has evolved our membership's view on the amendment.

Since the letter was sent our membership has fallen victim to circumstances that is beyond our control. Our Snapper season has been under siege. With the never ending saga of how we seem to continually loose days off our Red Snapper season we have entered into survival mode, concerning our access to the Red Snapper fishery. The increased buffer from the recent lawsuit, and the exasperated growth of state non-compliance has backed our membership into a corner that has us grasping at straws.

The DCBA supports reallocation. Yet, when the DCBA passed a vote to support Amendment 28 it was not with the knowledge that a Red Snapper payback provision was part of this process. The DCBA is not in support of any payback provisions in Amendment 28 for Red Snapper. Our membership feels that NMFS needs the MRIP numbers to be adjusted, since the increase in dockside intercepts, and evaluated before there is any more penalties handed down.

Looking forward we need more allocation to improve our situation. Yet, we do not believe that payback provisions will help us giving the already extremely over regulated, over penalized hole the For-Hire sector is already in. We want a new management system that has this already built in to it. We need a system that is sustainable for our livelihood. Thank you for considering the DCBA's position on Amendment 28.

Thank you,
Capt. Jim Green
Vice President-DCBA
Written on behalf the DCBA Board of Directors

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

Subject: ALLOCATION--please pass to council members

Categories: Charterboat, AP-Red Snapper

When the commercial allocation is reduced enough, to the point where they don't have any quota to lease to recreational fishermen, (CFH) The allocation split will be correct. The commercial sector has hijacked 10% of our amberjack causing us reduced seasons and loss of income. There is no way they should ever get an ounce more Red Snapper. In fact the original split should be re-examined. There is a sector out there that is spending millions of dollars annually, building new habitat for Red snapper and all fish in general. That sector is the recreational sector, mainly people that actually fish, along with some grant money from ENGO's , other government money , but mainly private money and TIME. I have been to many, many Artificial reef meetings and functions and have never seen a commercial fisherman spending any of his time or money to help grow our fisheries, by helping all these artificial reef associations. These fish belong to the public not to be leased to recreational fishermen by the commercial side.

Thanks,

Capt Tom Adams

To: Gulf Council
Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

If the human population of 7.2 billion is unsustainable, then our leaders must:

1. Give women their bodies back to decide which pregnancy will result in the birth of a child
2. Offer free vasectomies, tubal ligations and hysterectomies

This is much more humane than war, polluting our air, water and food supplies.

I pray you make wise decisions for not only today, but also for the generations yet to come to this Earth.

Best wishes,
Margarita

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

I realize that some council members do not support any recreational catch share scheme, no matter what name that scheme might take (sector separation, for-hire IFQ, etc).

Imagine our entire fishery being owned by foreign investors. I hope you find this a chilling thought. I find it just as chilling that my fishery could be owned by any entity.

The NRC said to define the universe of anglers. Magnuson even set a deadline. But NMFS lawyers weaseled their way through that, pulling the wool over a judges eyes.

Random surveys of that universe of anglers for catch and effort would provide estimates with a high degree of certainty.

Please listen to the overwhelming majority of anglers and charter captains. I urge you to eliminate the for-hire IFQ AP before you even appoint panelists.

Respectfully,

Subject: Overwhelming majority ignored?

Dear Council members,

I am a recreational angler. Sometimes I pay a captain to take me fishing while other times, I fish from my own boat or the beach.

Over the past six years, you have heard overwhelming opposition to this notion of sector separation. Remember Congress? They told you on several occasions that this is unacceptable and a violation of Magnuson, yet the Council majority continue to advance this illegal and ill-conceived idea.

What would our recreational numbers look like today if NMFS had actually worked on building a data collection system from a blueprint given to them 14 years ago (with a revision 8 years ago)? What if the Council spent as much time and effort holding NMFS accountable for following the blueprint?

Instead, it is plain to see that the 'squeeze play' is being run by cutting seasons and bag limits in the hopes of reducing the number of participants (less participants; less opposition).

I am at a loss for understanding the Council's actions. If the Council can be swayed to defy Congress by hearing the same song from the same small group of well-funded people, then I am compelled to join the chorus of opposition from the overwhelming majority in the hope that Council listens.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Governor Rick Perry and Gulf Council Members:

I do not personally know if "Amendment 28" is the right answer for the Texas Gulf Coast fisherman, or the businesses involved in harvesting red snapper on the commercial side. I do know, however, that a 9 day recreational snapper season is a slap in the face.

I personally would be open to a more restrictive state season so long as we are guaranteed a longer snapper season. I believe the full month of June and July would be my ultimate goal. We pay thousands of dollars on boats, fuel, tackle, and yet we are consistently given a back seat to the commercial fisherman... As if we do not contribute economically.

I highly suggest you get this figured out.

From: Dennis Formento

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

RE: Accountability Measures for the Recreational Red Snapper Fishery to be considered at the June 2014 Gulf of Mexico Fishery Management Council (Gulf Council) meeting

Dear Chairman Boyd,

On behalf of The Pew Charitable Trusts (Pew), please accept the following comments on proposed accountability measures (AMs) for the red snapper recreational fishery that are currently in Amendment 28 to the Reef Fish Fishery Management Plan (Amendment 28). We urge the Gulf Council to adopt both in-season and post-season AMs that provide reasonable assurance that chronic recreational annual catch limit (ACL) overages will stop. These measures are necessary to comply with both federal law and the recent *Guindon vs. Pritzker* court order¹, as well as to keep the rebuilding plan on track. Specifically, we recommend the Council approve:

- 1) **Action 2.1, Alternative 4:** implementation of an annual catch target (ACT) set 40% below the recreational quota, a level that is likely to prevent future recreational quota overages;² and
- 2) **Action 2.2, Alternative 2:** a full payback of recreational quota overages to act as a backstop in case the ACT selected by the Council fails to prevent an overage.³

Enforcing catch limits is critical to prevent a return to overfishing, which decimated the red snapper population, and to keep the rebuilding plan on track. Thus, these AMs need to be adopted and implemented in time for the 2015 red snapper recreational fishing season. However, this should be a first step in a broader effort to reform management of this fishery. It is critical the Council deal with the challenge of high angler demand for this limited resource by implementing new approaches for managing the recreational fishing sector. Tailoring these approaches to better meet the needs of charter-for-hire operators and private anglers is critical to effectively balance the desire for more stability and access for the recreational sector, while ensuring that this population continues to recover.

¹ *Guindon v. Pritzker*, Case 1:13-cv-00988-RWR, filed 06/28/13.

² 50 CFR 600.310(g)(2).

³ 50 CFR 600.310(g)(3).

In addition, we urge the Council to revise the ACL/ACT control rule so that it is a more useful tool for calculating buffers likely to prevent quota overages in fisheries such as red snapper. The current ACL / ACT control rule fails to capture significant sources of management uncertainty in this fishery. For example, inconsistencies in state seasons and the inability to constrain catch in state waters are main sources of management uncertainty in the red snapper recreational fishery, but are not captured in the control rule. Additionally, there are significant uncertainties in the recreational data, particularly this year as individual states are trying out new monitoring and reporting systems. It remains unclear how this data, in conjunction with the Marine Recreational Information Program (MRIP) data, will be used for estimating red snapper catch in 2014. **We recommend the Council reconvene the ad hoc ACL / ACT work group and request recommendations for revising the ACL / ACT control rule to better capture these sources of management uncertainty in time for the October Gulf Council meeting.**

Selection of an Annual Catch Target

Action 2.1 in Amendment 28 includes the following options for an ACT set below the recreational quota:

- Alternative 1: no action;
- Alternative 2: a 20% buffer, calculated using the ACT/ACL Control Rule established via the Generic ACL Amendment
- Alternative 3; a 30% buffer, based on the overage in 2012
- Alternative 4: a 40% buffer, which is the average of the overages from 2011 – 2013 and
- Alternative 5: a 60% buffer, based on the 2013 overage

In the past, we have advocated for the use of the Council’s ACL / ACT control rule to determine how large of a buffer is needed from the ACL to prevent the quota from being exceeded. This is because a properly crafted ACT control rule provides an incentive to reduce management uncertainty. As recreational catch is better managed and the frequency and magnitude of overages decrease, the buffer becomes lower and that will allow for more fishing. However, at present, the control rule is not as robust as it should be and fails to capture the broad range of factors that contribute to the high level of management uncertainty in this fishery.

Examining recreational catch data since 2007, Table 1 demonstrates that the amount of overage regularly exceeds the 20 percent buffer that would result from using the ACL / ACT control rule. **In fact, had an ACT set at 20 percent below the ACL been in effect during this time period, it would have prevented an overage just one year out of six.** This strongly suggests that a 40 percent buffer (Action 2.1, Alternative 4), is more appropriate at this time.

Table 1. Recreational ACL, Landings and Overages (in millions of pounds)

Year	Quota	Landings	Overages	Percent over
2007	3.185	4.440	1.255	39%
2008	2.450	3.712	1.262	52%
2009	2.450	4.625	2.175	89%
2010	3.403	2.239	-1.164	NA
2011	3.865	4.602	0.737	19%
2012	3.959	5.146	1.187	30%
2013	5.390	9.541	4.151	77%

The Summary Judgment in the recent *Guindon vs. Pritzker* case warns that a control that may technically qualify as an AM may not suffice in preventing overages, nor comply with the Order.⁴ Selecting a buffer of 40% provides much stronger assurance that the recreational ACL won't be exceeded going forward.

Overage Payback Provisions

Action 2.2 in Amendment 28 provides the following options for payback of any overage of the recreational quota:

- Alternative 1: No action
- Alternative 2: A full payback of any overage while red snapper is in a rebuilding plan, and appropriate adjustment to the following year's recreational quota and ACT.
- Alternative 3: A full payback of any overage while red snapper is in a rebuilding plan, and appropriate adjustment to the following year's recreational quota and ACT, plus an additional application of an additional ACT of between 30 and 100 percent of the amount of any quota overage.

The purpose of employing an ACT is to prevent the ACL from being exceeded. However, in the event that the ACT and other measures fail to prevent an overage, a payback provision should be employed. This is needed to keep the rebuilding plan on course and fully comply with federal law and the court order. If the Council selects an ACT in Action 1.1 that is less than 40% below the recreational quota, the implementation of a payback provision is even more important as that increases the likelihood overages will continue to occur. The National Standard 1 Guidelines call for the use of a payback provision for species that are under a rebuilding plan.⁵

Implementing a full overage payback for red snapper would also be consistent with how the Gulf Council manages other species under rebuilding plans, such as gag, amberjack and gray triggerfish.

Conclusion

To date, the Gulf Council has not implemented effective AMs for the red snapper recreational fishery. This is an important opportunity to set up an AM system that prevents overages, guards against a return to overfishing and keeps this population on the road to recovery. Thank you for the opportunity to provide comments on red snapper recreational accountability measures. We look forward to continuing to work with the Gulf Council, staff, and stakeholders on this and related issues going forward.

Sincerely,

Chad W. Hanson
Officer, U.S. Oceans, Southeast

From: Richard Craig

To: Gulf Council

Dear Governor and Gulf Councils.

The second weekend of this snapper season, my boat caught 200lbs of snapper in 45 minutes. This entire controversy is fabricated.

A couple of mandatory changes:

- 1) Manage the reef fish through the State of Alabama, and stop the insane federal management immediately.
- 2). Manage the allocations based on total economic impact- not commercial segment political influence.
- 3) Begin the planning to reduce / eliminate commercial fishing of wild fish stocks. Market hunting almost eliminated whitetail deer and wild turkey populations, which both are thriving solely due to recreational influence.

Feel free to contact me if necessary,

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Thursday, June 19, 2014 at 6:19:42 PM Eastern Daylight Time

From: Mike Wood

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

I believe it's imperative to begin drawing catch data from private fishermen who fish private reefs and stop relying on catch numbers from publicly fished locations. Our snapper are bigger and more numerous than ever and a conservation plan is needed to sustain that. However this fishery is underfished, and the feds know it. Jobs are lost with every ridiculously small season enforced, jobs from bait shop help all the way up to charter captains trying to feed their families. Get our people some real relief that will allow our fishery and local economy to thrive while keeping our snapper population the best on the gulf coast. I know it's possible, we just need your help.

Thanks, Gabe Tidmore

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, June 18, 2014 at 10:38:06 PM Eastern Daylight Time
From: Carole Stephan
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Allen Branton

To: Gulf Council

Dear Governor and Gulf Council Members:

I know that you've seen this letter many times but please read my comments. I haven't had a chance to fish for snapper this season and don't know if I will due to sports. What I ask of you Al is that you don't give my son's fish to anyone else. We live her in gulf breeze and are fortunate enough to have a boat. I feel that this letter is from the commercial industry which the government has already let have way to much of the allocation. This amendment is just another group that is taking away from me being able to take my son fishing. Now if we want to pay for a charter boat this will help but we the locals with our own boat are going further to the bottom of the list. Please keep a couple fish for our children.

Thank you.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Wednesday, June 18, 2014 at 2:20:58 PM Eastern Daylight Time

From: Francis Murray

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Francis Murray

June 18, 2014

Mr. Doug Boyd, Chair
Gulf of Mexico Fishery Management Council
2203 North Lois Avenue
Tampa, FL 33607

Dear Chairman Boyd:

On behalf of the Charter Fishermen's Association ("CFA"), we urge the Gulf Council to change course at its June 2014 meeting.

As you know, the federal court ruled in *Guindon v. Pritzker* that the existing state of recreational Gulf of Mexico red snapper fishery management violates the Magnuson-Stevens Act (MSA). As federally-permitted charter boat captains who have been bearing the brunt of shorter and shorter seasons, we know this all too well. The question is, how do we deal with this ruling? And how do we do so in a way that is legal, fair, and better for fish and fishermen?

Thus far, the council and the National Marine Fisheries Service (NMFS) have indicated the intention to use measures to address the court ruling that follow an approach that is virtually identical to the measures previously held illegal. Continuing down this path makes no sense, and at some point, logic and the law reach the same conclusion; as the court reasoned, continuing a failed strategy is illegal because "administrative discretion is not a license to engage in Einstein's definition of folly—doing the same thing over and over again and expecting a different result." *Guindon v. Pritzker*, 2014 WL 1274076 at *18 (D.D.C., March 26, 2014). **Instead of Einstein's folly, we need accountability measures that are tailored to each sector of the recreational fishery and a clear long term path to more accountable management plans.**

With ever-growing numbers of private recreational anglers and non-compliant state water fishing, continuing to ratchet down the number of federal fishing days not only unfairly devastates our businesses, it is illegal as well. The Council's goal should be to apply fair and effective accountability measures wherever practical. Thus, as opposed to grouping for-hire captains and private anglers in a single category of "difficult to manage" recreational fishers, the Council should recognize that the for-hire subsector is subject to effective management through tools that have already proven effective in the commercial sector.

The U.S. Supreme Court has recognized that it is unlawful for an agency to “fail to analyze a potentially effective alternative in its own right” by failing to “separately consider the ... option” but instead “treating it together with another option in a category.” *Motor Vehicle Mfrs. Ass'n of U.S., Inc. v. State Farm Mut. Auto. Ins. Co.*, 463 U.S. 29, 55-57 (1983) (noting that because of this categorization error, an agency decision failed “to offer the rational connection between facts and judgment required to pass muster under the arbitrary and capricious standard”). This decision, and others like it, clarify that the National Marine Fisheries Service will not be able to lawfully ignore feasible and effective accountability measures by grouping the for-hire subsector with private anglers in a single “difficult to manage” sector of recreational fishers.

Immediate Actions Needed

In order to develop a lawful approach to Red Snapper management in the Gulf, Council should abandon the current approach of adding accountability measures (AMs) to Amendment 28, and build accountability into an expedited Amendment 40, including options for measures tailored to management performance.¹

Amendment 40 would separate the for-hire and private recreational subsectors. The MSA contemplates exactly this kind of subdivision, requiring that fishery management plans “to the extent that rebuilding plans or other conservation measures which reduce the overall harvest in a fishery are necessary, allocate . . . any harvest restrictions or recovery benefits fairly and equitably among the commercial, recreational, and charter fishing sectors in the fishery.” 16 U.S.C. § 1853(a)(14) (emphasis added).

Here, such allocations are particularly important because NMFS has acknowledged that the private angler sector has higher management uncertainty than the for-hire subsector. For example, the agency has noted that “landings data for the private recreational component are associated with a higher degree of uncertainty. When private recreational landings estimates are combined with for-hire landings data, less effective management measures may be implemented in the recreational sector.”² This distinction results in part from the open access and growing nature of the private angler sector compared with a long-standing moratorium on federal for-hire reef fish permits, non-compliant state regulations that allow longer fishing seasons (some year-round) with higher bag or lower size limits for private anglers but not federally-

¹ The reallocation in Amendment 28, if finalized, will likely be challenged in court and, more importantly, would add at best two days of additional recreational fishing per year. See Gulf of Mexico Fishery Management Council and NOAA, Red Snapper Allocation, Public Hearing Draft for Amendment 28 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (March 2014) (“Amendment 28”). .

² Gulf of Mexico Fishery Management Council and NOAA, Draft Options for Amendment 40 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (Feb. 2014) (“Amendment 40”).

permitted for-hire operators, and more difficult catch monitoring and enforcement for private anglers.

It is distinctly unfair for the for-hire sector, comprised of more accountable vessels with less management uncertainty, to be covered by the same buffers and payback provisions as private anglers as currently foreseen by the Council. These same characteristics were the basis for the court's recent conclusion that applying the same accountability measures across multiple sectors was illegal. See *Guindon v. Pritzker*, 2014 WL 1274076 at *22-*23 (D.D.C. March 26, 2014) (noting different levels of management uncertainty for different sectors and striking down AMs that did not reflect that difference).

The MSA also requires that any allocation “take into consideration the economic impact of the harvest restrictions or recovery benefits on the fishery participants in . . . the commercial, recreational, and charter fishing sectors” and make a fair and equitable division after doing so. 16 U.S.C. § 1853(a)(14). Here, of course, the participants in the charter fishing sector have suffered severe economic impacts because harvest restrictions reduced the number days for-hire operators could take customers fishing for red snapper and related revenues. By the same token, now that the stock is rebuilding, the recovery benefits are being enjoyed primarily by private anglers fishing in state waters - where non-compliant regulations allow them to land increasing numbers of fish -- while federally-permitted for-hire operators suffer under the shortest season on record. These contrasting economic impacts illustrate the unfairness of failing to separate the for-hire subsector and apply differential buffers and payback provisions that reflect its greater level of accountability and management uncertainty.

The solution is to partition the recreational fishery into for-hire and private angler sectors (as currently proposed in Amendment 40), and then to implement specific accountability measures for each sector in accordance with their differing degrees of management uncertainty. The for-hire sector, for example, would almost certainly require a smaller buffer than the private angler sector to achieve the same likelihood of avoiding an overage. In addition, the for-hire sector could more readily adopt measures like electronic logbooks and near-real time reporting (indeed, headboats have already done so) which would further reduce its management uncertainty. By formally partitioning these sectors and adopting different sets of accountability measures now, the Council could also more easily make targeted adjustments to such measures in the future if management uncertainty for one sector is reduced. Finally, by partitioning the recreational fishery each component would only pay back overages caused by that sector but not by the other sector. This approach would fully comply with the court's order in *Guindon v. Pritzker* and the MSA.

Longer-term Solutions

As we noted above, getting the short-term accountability measures right is important, but most important is moving forward with a management program that improves

accountability, performance, and truly allows the participants in the recreational fishery to experience the benefits of recovering stocks. The commercial red snapper fishery is managed successfully with individual fishing quotas (IFQs), a program that NMFS refers to as an accountability measure.³ To be clear, the IFQ is the accountability measure, and it is one that works. Unlike buffers and paybacks that punish charter businesses and anglers with shorter seasons because regulators fail to constrain catch to quota, IFQ management would promote accountability incentives that also provide us flexibility to operate successful businesses. For these reasons, we support the Council's action to scope a for-hire IFQ and provide our ideas for its design below.

What is the program?

We recommend a multispecies IFQ management plan for Gulf of Mexico charter for-hire vessels operating in federal waters. IFQs would assign allotments of fish to individual federal charter for-hire permit holders held responsible for managing catch and complying with rules. Bag limits and season closures would be unnecessary for this sub-sector. Fishing would be year-round and charter customers could retain fish at any time, provided that the shareholder's IFQ account still has a sufficient allocation remaining.

What are the goals of the program?

1. Viable charter fishing businesses
 - Longer season provides flexible business planning and improved fishing opportunities for charter customers
 - Profitable, stable charter fishing businesses with a long-run stake in sustainable Gulf fisheries
2. Improved stock health
 - Increased quotas as stock rebuilds
 - Lower discards inside and outside of regular fishing seasons
 - Faster rebuilding of overfished stocks, preventing decline of others
3. Effective management
 - Faster, more accurate charter fishing catch and effort data collection
 - Better monitoring, enforcement, and compliance with quotas
 - Improved cooperation between industry and government

How will the initial allocation be made? Will the quota be transferable?

Since landings history for each vessel is not available, the initial allocation would be calculated by dividing the for-hire quota evenly between federal permit holders. The Council should explore whether it is possible to identify "latent permits" before this division. Shares might be weighted by each Gulf state's contribution to historical charter landings, as estimated by the Marine Recreational Information Program (MRIP). Within each state, shares may be distributed to federal permit holders equally (with potential weighting for "6-pack" and "overload/multi-passenger" vessel

³ 79 Fed. Reg. 27,768, 27,769 (May 15, 2014)

capacities). Regarding transferability, all participants in the program would be eligible to buy, sell, and lease charter IFQ shares and annual allocations.

Who is eligible to participate?

All charter vessels with a valid federal Gulf of Mexico reef fish charter for-hire permit would be eligible to participate.

How can we balance perceived economic and social trade-offs of the program?

Many are concerned about the social effects of IFQ programs, and in particular the potential for the program to create “share-lords.” The charter-for-hire IFQ program can be designed to limit the concentration of shares among participants. This can be accomplished through share ownership caps and/or lease caps. These restrictions have to be balanced against the goals of the program.

What species should be included?

While we would support a single-species start through a red snapper IFQ plan, we believe that an ideal program would take a multi-species approach. A multi-species IFQ would provide charter businesses with the most flexibility while likely achieving conservation benefits due to reduced discards. We suggest that the IFQ cover the top reef fish species targeted by for-hire businesses across the Gulf, including but not limited to: gag grouper, gray triggerfish, greater amberjack, red grouper, red snapper, and vermillion snapper. This would be similar to the multispecies commercial IFQ program that covers red snapper, grouper, and tilefish.

How would the program be monitored and enforced?

Monitoring and enforcement should be consistent with the existing commercial IFQ plan as much as possible. This may require that:

- All participating vessels will install, maintain, and operate a vessel monitoring systems (VMS). VMS units are already installed on some charter boats, and the Council has indicated an interest in increasing VMS coverage to increase accountability and geo-spatial data;
- Vessels must “hail out” when leaving dock and “hail in” with estimated landings using VMS or phone before landing at approved landing sites. Landings sites will be developed by charter fishermen and approved by NMFS.
- Trip-level landings will be reported by VMS or other approved electronic reporting technology, followed up by electronic logbooks on the same day of the trip.
- Vessels will cease directed fishing for charter IFQ species upon exhausting their allocation of those fish, regardless of whether the general recreational fishing season is otherwise open for those species.

In conclusion, we urge the Council to change course at its June meeting so that staff can prepare management alternatives for Council review at the August meeting with final approval at the October meeting. The charter fishing sector needs these changes in place by the 2015 season.

Please consider these comments part of the administrative record for Amendments 28 and 40. We realize instituting such changes require a lot of work, and we stand ready to help in any way we can. Thank you for considering our proposal and we look forward to working with you.

Sincerely,

From: Casey Hicks

To: Gulf Council

Jun 18, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Ms. Casey Hicks

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Christopher Sable

To: Gulf Council

Jun 18, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Christopher Sable

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Wednesday, June 18, 2014 at 8:44:23 AM Eastern Daylight Time

From: Myra Hefner

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

We know our seafood is, and has been, in decline due to overfishing. Do something that will allow for our seafood to recover. Then everyone can have their seafood. Do something that is good for our state.

Subject: Reef Fish Amendment 28

Date: Wednesday, June 18, 2014 at 4:15:51 AM Eastern Daylight Time

From: Michael Wilkes

To: Gulf Council

Jun 18, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Michael Wilkes

I will gladly wait to see a gradual change in my success as a recreational fisherman if it means a better economy and more stability in fish populations.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, June 17, 2014 at 8:26:37 PM Eastern Daylight Time

From: PHILLIP CHEN

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

I don't know the particulars of Amendment 28. They say that it will hurt small commercial fishing operations. I don't know about that, but I do know that the current laws have hurt the recreational guides. I know this because my family had a tradition of an annual deep sea trip. Since the season and limits have been cut on all species, we have stopped going. I know of others who have also stopped taking these trips.

Please stop relying on biologists' studies and go spend some time with ALL the fishermen in the Gulf so that we can all enjoy it without the government screwing that up like they have so many other things.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: gulf of Mexico red snapper quotas

Date: Tuesday, June 17, 2014 at 11:39:36 AM Eastern Daylight Time

From: Carl Erickson

To: Gulf Council

Dear Sir or Mam, I am writing this email due to the fact that I cannot attend your Key West meeting in June of 2014. I am a recreational fisherman of 40 years, born and raised in the state of Florida. I have been researching the quota's limits that have been imposed on the recreational fisherman in the Gulf of Mexico for many years. I cannot fathom that the data used by NOAA and the Gulf Council is either recent or accurate. The red snapper population in the west central Florida area is vastly underestimated, with recreational trips of 40 or more fish every time they are targeted and a dozen when they are not. Being that fish population is a main concern of both the gulf council and recreational fisherman please access quotas that are realistic and accurate to the population of the fish in the region. Not by a scientist or researcher whom uses calculated methods based on prehistoric data of the species population. Get out of the lab and into the gulf and they will find out the real story.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, June 17, 2014 at 11:16:01 AM Eastern Daylight Time

From: Nancy Bonaventure

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: William Cochrane SR.

To: Gulf Council

Dear Governor and Gulf Council Members:

As you all know, the NMFS and The Gulf Council is supposed to manage the Gulf Fisheries in a way that assures the Fishery is sustainable and accountable. A perfect accountability system is in place for the commercial fishery, but not in the recreational fishery.

It is absoutley insane to even consider taking allocation from the commercial sector and giving it to an unaccountable sector (recreational).

Instead, the recreational sector should have a system in place to be accountable. This could include iSnapper, etc.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, June 17, 2014 at 10:06:00 AM Eastern Daylight Time

From: Loe Miree

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Our Gulf is valuable to the daily lives of many folks. It seems that legislation has become a tool to beat the citizens who have invested several lifetimes in that part of our lovely state.

Enough is enough, just do your job, and that job is to the people of this state, not tunnel visioned recreational fishermen.

Subject: Reef Fish Amendment 28

Date: Tuesday, June 17, 2014 at 7:43:49 AM Eastern Daylight Time

From: Mike Schoonveld

To: Gulf Council

Jun 17, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Mike Schoonveld

Jun 16, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. Gary Zurn

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 16, 2014 at 2:40:01 PM Eastern Daylight Time

From: Diane Cloud

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Carol Tench
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt the already diminished & hurting small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future. This will also hurt consumers with exorbitant pricing, lack of availability, & restaraunters serving local fare, as well. The famous pink shrimp of Ft Myers & SW Florida has already gone into decline, & there are fewer & fewer local fishermen & shrimpers in the area, whose classic wooden boats draw tourists for a taste of local flavor & ambiance. Prices have skyrocketed for these precious shrimp, & most juveniles are used as bait by local & tourist recreational fishermen.

I'm a recreational fisherwoman, so while the idea of increased snapper opportunities sounds great on the surface of it, if the local businesses decline further, it will impact the quality of life for us all. We must think & act as a community, & I'm not interested in being forced to buy imported from China, health-hazardous fish! Let our boys work on the water, & keep the tradition alive. Everywhere one travels along the seaboard of the US, there exist markers, & museum histories, but fewer & fewer "local feel" sites to enjoy. And while US fishing history is brief compared with other countries around the world, what we do have is valuable & precious, for many reasons.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high. Look around you & you'll see how consumers are voting with their pocketbooks for local & fresh sustainable fare, from small farmers, to co-ops, to local weekend farmer's markets -- buying fresh fish is the same idea.

Please, please, oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Thank you in advance for your attention to this matter. I know it will make a difference the next time you're here & want to eat healthy, delicious fare, as well as enjoy the local cultural scene.

Sincerely,

Carol Tench, avid fisherwoman & sailor.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 13, 2014 at 3:45:23 PM Eastern Daylight Time

From: Brenda James

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Friday, June 13, 2014 at 9:59:47 AM Eastern Daylight Time

From: Joe Balsamo

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28"

Is great for recreational fisherman who cant afford to spend the money to lobby for their rights to fish

the Commercial sector spend lots of money lobbying for these amendments and closures which just are not fair to the recreational fishermen

The commercial guys have 10's of thousands of pounds of by catch or small snapper a year or other fish for that matter

Why should we the recreational fisherman suffer while the commercial industry lines their pockets with more money and keeps destroying the fishery and blaming the weekend warrior

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members: Please reconsider applying this law. For centuries we have lived off of the sea and this has created jobs for generations of fishermen to sustain their loved ones. I love the sea and all its creatures but GOD has placed them there for a reason, so we can feed off of them. Although we need not over fish them and we must consider the amounts that are fished or have brederies of red snappers and all the other fish that are in this petition so when they are ready they can be introduced to the sea once again. By this you will create again more jobs and fishermen will not be in harm of loosing their generation jobs. Please consider my opinion and do not ban this fishes from our fishermen we have had enough with all the gulf oil spills to now be worried about this new law you want to enforce. I am not a fisherman nor the family of one but i support them like my own. Thank you.

Subject: Reef Fish Amendment 28

Date: Thursday, June 12, 2014 at 11:20:16 AM Eastern Daylight Time

From: john katinos

To: Gulf Council

Jun 12, 2014

Gulf of Mexico Fishery Management Council

As one of the Gulf of Mexico region's 3 million saltwater recreational anglers, I strongly support Alternative 5 of Reef Fish Amendment 28, which would allocate 75 percent of quota in excess of 9.12 million pounds to the recreational sector. The current red snapper allocation is based on information from 30 years ago and does not distribute the resource in the best interest of the nation.

The current allocation of 51 percent to the commercial sector and 49 percent to the recreational sector was based on historic catch at a time when red snapper abundance was at an all-time low and recreational participation was therefore disproportionately low due to poor fishing success rates.

Several studies, including from the Gulf Council's Socio-Economic Science and Statistical Committee, conclude that substantial economic benefits would be gained by shifting a greater share of the red snapper quota to the recreational sector.

Alternative 5 is a very reasonable approach that does not take any fish away from either sector, but rather apportions future increases in stock biomass in a way that recognizes the tremendous demand among recreational anglers for this important fish stock.

While reallocation discussions are inherently contentious and difficult, there is too much at stake for the Gulf Council to continue inaction on this issue. By moving forward with Alternative 5, the Gulf Council would make significant progress towards rectifying the flawed initial red snapper allocation.

Thank you for your consideration.

Sincerely,

Mr. john katinos
