

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, August 3, 2015 11:37:36 PM Eastern Daylight Time

From: Cherie Trahan

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Steve Hardy

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would begin to build some sanity back into the management of Red Snapper in the Gulf of Mexico. Instead of lining the pockets of less than 300 commercial share holders, it will make more fish available for recreational anglers--the backbone of the local fishing communities.

Ultimately, management of Red Snapper and other fisheries should follow the American tradition of eliminating commercial interest from the field entirely. Remember, it was commercial hunting that drove the passenger pigeon to extinction, and nearly drove the American Bison to extinction as well. The management model to follow is the North American Waterfowl plan where all commercial interest is eliminated and recreational interests pay for habitat restoration and wildlife management through license and excise tax fees. Today, Commercial interest are cashing in on the resource and contributing nothing in return. They paid zero for millions of dollars in windfall profits and now greed is driving them to cling to every vestige of the patronage game.

Don't fall for the false claims of 10's of thousands of constituents that support the commercial interests--the only supporters of the commercial system are the profiteers lining their pockets at the expense of everyone else.

Please support Amendment 28 as a beginning point in righting the wrongs promulgated by the Gulf Council. It is not enough, but it is a start in the right direction.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Please do not take the commercial red snapper allocation and hand it over to the recreational sector. The CCA has convinced the Gulf Council that reallocation will give the recreational sector more days to fish. This is simply not true. Reallocation will not give recreational fishermen a stable fishing season. On the contrary, here's just a small sample of what reallocation will do... and it's not good:

- 1) Hurt fishing businesses that support the nation.
- 2) Disrupt the seafood supply chain and access to red snapper by all consumers.
- 3) Take red snapper off the plates of the 97% of Americans who want to enjoy red snapper but can't go catch it themselves.
- 4) Undermine the work the commercial sector has done to help rebuild red snapper population.
- 5) NOT prevent recreational overharvesting.
- 6) Hurt the red snapper population in the long run by increasing effort in the eastern Gulf where the population is most vulnerable.
- 7) Unfairly penalize commercial fishermen for staying within their quota while the recreational sector went over their quota in 21 of 23 years (between 1991 and 2013) by over 18 million pounds.
- 8) Cause the very problem recreational fishermen are facing – instability and uncertainty that prevents them from planning for their fishing year.
- 9) Set a dangerous and very real precedent for taking away commercial red grouper, gag, shallow and deepwater grouper, and tilefish quotas.
- 10) Sets a dangerous and very real precedent for taking away charter opportunities in order to "solve" private angler problems, or taking away commercial crab/lobster tags to hand over to the recreational fishery.

I strongly support Amendment 28 Alternative 1 (No Action) because reallocation is not the solution.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Red Snapper

Date: Thursday, July 30, 2015 3:07:58 PM Eastern Daylight Time

From: Steve Rash

To: Gulf Council

CC: rick.scott@eog.myflorida.com

My name is Steven Rash and I own Water Street Seafood, Inc. in Apalachicola. I employ over two hundred people in the fishing and seafood processing industry. Reallocation of Red Snapper from the commercial sector to the recreational sector will have a very negative impact on my business and will cause the loss of a large amount of jobs. The commercial sector has fished responsibly and under strict accountability measures for years while the recreational sector has fished irresponsibly and with little accountability. Red snapper provides a significant contribution to our economy in the form of jobs and commerce through the entire supply chain from the fishermen to the restaurant or retailer that provides American consumers with this natural resource. It would be unfair to deny American consumers access to this resource for the benefit of recreational fishermen who have resisted any form of accountability and who have drastically over fished their sector's quota for years and years with no consequences.

The Gulf Council should take a hard look at the Red Snapper quota and even closer look at the regulatory discard mortality in all sectors and revise the ABC to greatly reduce the huge waste in this fishery. We are all committing a crime against nature by wasting such a valuable resource.

Sincerely,
Steven Rash
President
Water Street Seafood, Inc.

In regards to the Red Snapper ABC for this year for the Recs ..I hope that all of you will be voting for the 14.3 mi/pds for the ABC. I assume that that will be coming to a vote soon and hope that we can all agree that the RS are rebuilding at a much faster pace than anticipated and more should be brought to the table. In my opinion it will help the other species as well. Thanks

Thanks,

Subject: Red Snapper Reallocation

Date: Thursday, July 30, 2015 11:52:18 AM Eastern Daylight Time

From: Carolyn Wood

To: Gulf Council

Dear Gulf Council,

Do not take the commercial red snapper allocation and hand it over to the recreational sector. The CCA has convinced you that reallocation will give the recreational sector more days to fish. This is simply not true. Reallocation will not give recreational fishermen a stable fishing season. On the contrary, here's just a small sample of what reallocation *will* do... and it's not good:

- **Hurt fishing businesses that support the nation.**
- **Disrupt the seafood supply chain and access to red snapper by all consumers.**
- **Take red snapper off the plates of the 97% of Americans who want to enjoy red snapper but can't go catch it themselves.**
- **Undermine the work the commercial sector has done to help rebuild red snapper population.**
- **NOT prevent recreational overharvesting.**
- **Hurt the red snapper population in the long run by increasing effort in the eastern Gulf where the population is most vulnerable.**
- **Unfairly penalize commercial fishermen for staying within their quota while the recreational sector went over their quota in 21 of 23 years (between 1991 and 2013) by over 18 million pounds.**
- **Cause the very problem recreational fishermen are facing – instability and uncertainty that prevents them from planning for their fishing year.**
- **Set a dangerous and very real precedent for taking away commercial red grouper, gag, shallow, deep, and tilefish quotas.**
- **Sets a dangerous and very real precedent for taking away charter opportunities in order to “solve” private angler problems, or taking away commercial crab/lobster tags to hand over to the recreational fishery.**

I strongly support Amendment 28 Alternative 1 (No Action) because reallocation is not the solution.

Carolyn F. Wood

Red Snapper Commercial Fisherman

Subject: Charter Fisherman's Association Comment on Amendment 28

Date: Tuesday, July 28, 2015 10:39:24 AM Eastern Daylight Time

From: andrew cantrell

To: Gulf Council

Please see attached comments from the Charter Fisherman's Association on Amendment 28 and add to the administrative record.

Thank You.

July 28, 2015

The Charter Fisherman's Association respectfully requests that the Gulf of Mexico Fishery Management Council (Gulf Council) adopt Action 1, Alternative 1 when finalizing, passing and implementing Reef Fish Amendment 28 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (Amendment 28).

As the largest federally permitted charter boat association in the Gulf of Mexico, the Charter Fisherman's Association appreciates the opportunity to provide comment on Reef Fish Amendment 28 of the Gulf Council. Our membership includes a large number of dually permitted vessels, holding federal permits for both charter/Headboat and commercial fishing, and this amendment would cause undue economic harm on these federally permitted commercial businesses.

The proposed reef fish amendment 28 would destabilize the seafood supply chain and create unnecessary instability on the fragile small businesses within our organization by removing fish from the commercial sector of the Red Snapper fishery. With respect to the Recreational sector of the fishery, there are no meaningful or significant impacts to be gained in terms of fishing days or season lengths by recreational fishermen.

As it stands, the most effective way to increase season lengths and fishing days for the entire recreational sector would be through management changes or increased accountability. The Charter for-hire component of the recreational fishery is on the path to both of these improvements and the council is in the early development stages for the private angler component. Through increased accountability and proper management, each segment of the recreational fishery could experience longer seasons and more fishing days with a reduced buffer on the recreational Annual Catch Target. These gains far surpass any perceived gains from reallocating quota from the fully accountable, hard working American commercial fishermen.

Sincerely,

Shane Cantrell, Executive Director
Charter Fisherman's Association

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Tuesday, July 28, 2015 11:17:16 PM Eastern Daylight Time

From: Andrea Sweeney

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 9:19:41 PM Eastern Daylight Time

From: Ronald Heasley

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 6:53:42 PM Eastern Daylight Time

From: Martha Saywell

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 5:37:08 PM Eastern Daylight Time

From: elena nogueira

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 5:12:16 PM Eastern Daylight Time

From: R. Scott Childress

To: Gulf Council

Dear Governor and Gulf Council Members:

My name is Scott Childress and I have been a commercial fisherman for 9 years. I run a small fishing business, G & S Fishing, LLC, out of Hudson, Florida. I have one boat and I employ five people. My business directly impacts six fishing families including my own. I have been involved in the management aspect of our fishery for many years and have attended Gulf Council meetings, FWC meetings, and various fisheries work shops. I am also a recent attendee of the Marine Resource Education Program Science Workshop which was held at the FWC's Fish and Wildlife Institute in St. Petersburg. I am not just some fisherman sending a form letter that does not know what is happening in our fishery. I have tried to educate myself in order to be able to make informed and knowledgeable decisions about issues regarding the management of our incredible resource. I can, without a doubt, tell you that it is a bad idea to reallocate more of a fishery to a sector of the fishery that is unaccountable, period!

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Here are just a few reasons why reallocation is bad and you should not support it:

Commercial fishermen like myself have spent years building stable business plans.

Taking quota away from us destabilizes our businesses and opens the door for a constant reshuffling of the deck. This would not be good for a mom-and-pop coffee shop or a small family ice cream store, so why would it be good for a commercial fishing business?

Hurting commercial businesses to pretend to help extend recreational fishing seasons is disingenuous and not fair. The FWC and the Gulf Council should be working on finding solutions that help everyone, rather than hurting one group of people to help another.

The Gulf Council went on the record saying that they want to develop a committee of private recreational anglers to start coming up with ideas to fix the recreational fishery. This is great news. Since taking quota from commercial fishermen won't help extend the federal red snapper season, let's put this issue to bed and focus on making sure this new Committee finds some real solutions.

The analysis of Amendment 28 shows that taking quota from commercial fishermen and giving it to the recreational sector will actually hurt the red snapper population and could lower quotas for everyone in the future. There are more red snapper in the Gulf now than there have been in years, and we can't afford to go backwards again.

Recreational fishermen have gone over their red snapper quotas by 18 million pounds in the last few years. We don't blame recreational fishermen for this, we blame the Gulf Council and NMFS for not giving recreational fishermen a better management plan.

I don't believe we should take quota from commercial fishermen because the Gulf Council and NMFS failed to manage the recreational fishery properly.

I am not aware of a single commercial red snapper fisherman in the Gulf of Mexico that supports reallocation. More than 95% of the charter fishermen that have come to the Council meetings and spoken up on this issue oppose reallocation. Even people in the seafood supply chain (fish houses, restaurant associations, and seafood consumers) have spoken up and written letters they oppose reallocation.

From one businessman to another, I urge you - please do not support reallocation.

Thank you for taking the time to read and consider my comments.

Respectfully,

R. Scott Childress

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 4:28:43 PM Eastern Daylight Time

From: Melissa Mercer

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

As a seafood loving consumer, I oppose this amendment and urge you to do the same.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 3:34:34 PM Eastern Daylight Time

From: Joe Mecus

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

Red Snapper is a success story for good fishery management. Now we have lots of young snapper, but they have not reached anywhere near spawning potential. We need to continue to manage this resource for sustainability.

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 1:24:27 PM Eastern Daylight Time

From: Judy Schwenk

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 1:04:46 PM Eastern Daylight Time

From: Mary P. Acquino

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 12:51:07 PM Eastern Daylight Time

From: chris danne

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 12:40:57 PM Eastern Daylight Time

From: John-Christopher Ward

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 27, 2015 12:27:41 PM Eastern Daylight Time

From: Kandy Mathis

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, July 15, 2015 4:47:08 PM Eastern Daylight Time
From: Helen Jo Williams
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Tim Dyer

To: Gulf Council

Dear Governor and Gulf Council Members:

I am in full support of "Amendment 28". As a recreational fisherman I spend on average of \$175.00 a trip to take my family fishing. No I'm not rich but we do enjoy fishing but have gone a total of 4 times this year. The way the limits and closures of the different types of fish has made it totally unecomonical for us to go. I do use our fishing to supplement our groceries as well as spending time on the water with family and friends. That being said I have been getting chain emails from commercial fishermens lobbyist with prewritten letter to you to defeat this amendment. As a matter of fact this email is being written on their site with their form, I just erased the misinformation that they want you to believe. Myself and all my friends that fish recreationally have been fed up for going on two years. We don't feel as we have a voice in any the laws and limits and seasons that seem to be getting arbitrarily set with no rhyme nor reason except lobbyist have your ears and we do not. My hope is that some commen sense regulations can be set seeing how there or more red snapper out there now than ever in my life time. Sincerely,
Timothy P. Dyer, Mobile Al

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Tuesday, July 14, 2015 12:03:05 AM Eastern Daylight Time
From: Paula Purvis
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 8:33:35 PM Eastern Daylight Time

From: Hannah King

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Mr. Governor

I cannot begin to tell you how many Jobs would be lost by voting for Amendment 28. Please don't vote for this amendment. For example:

The Red Drum was taken away from the commercial fishermen in the 1980's and made into a sportsman's fish only and because the recreation fisherman has no accountability the fish it has over populated the gulf of Mexico. The cause and effect is an Eco system that is off balance . There is more red drum now than ever and it eating all the natural foods of other species such as Sheephead , black drum two income producing resource's for small local fishing families.

The evidenced is out in the gulf of Mexico that shows we need the keep the commercial snapper quotas as is for the sake of the eco system and for the financial benefit to the small local fishing families.

thank you for taking the time to read this

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Monday, July 13, 2015 3:47:13 PM Eastern Daylight Time
From: Maria S
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 1:47:33 PM Eastern Daylight Time

From: Marlene Clemmons

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Richard Lovesky

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would be a great plan to protect red snapper, and keep commercial interests from over-fishing Red Snapper into extinction. It is well known that the commercial fishing interest is only concerned with profits, and cares only that it makes as much money as possible. When Red Snapper become extinct, they will move to the next species to target.

"Amendment 28" is a genuine promise to recreational fishermen who will experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is totally fair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please support Amendment 28 and allow real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that help sustain the availability of the species for future generations.

We have a species that is perfect for the commercial fishing industry, and it is not only sustaining, it is thriving- Lionfish. This invasive species are shown in huge numbers in deeper water which is readily accessible to commercial fishermen, but not so to the recreational fisherman. Lionfish are absolutely delicious, and sell in the \$20 per pound range. They have no natural predators in Gulf waters, and gobble up native species at an alarming rate.

This would be a WIN/WIN.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 12:49:30 PM Eastern Daylight Time

From: Bullock John

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 12:08:37 PM Eastern Daylight Time

From: Joyce Faulk

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 11:39:32 AM Eastern Daylight Time

From: Andrea Presberg

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

We as consumers outweigh and outnumber the amount of recreational fishermen and should have more representation provided. How are rules being made for a vast minority when undercutting the majority would cause so much harm?!?!?

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, July 13, 2015 10:43:55 AM Eastern Daylight Time

From: Paul O'Neill

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast. Some versions of the proposal could cut more than one million pounds of popular red snapper from the consumer market in 2016.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To Whom It May Concern:

I oppose red snapper reallocation through Reef Fish Amendment 28. Status Quo (No Action) is the only alternative I can support.

- Commercial fishermen have stayed within their annual catch limit every year while recreational fishermen have exceeded theirs in 6 of the last 7 years.
- Commercial fishermen have worked hard to promote conservation in order to help the red snapper population recover. Reallocation does not promote conservation and may actually hurt the red snapper population.
- Reallocation will not solve the problems of the recreational fishery and, in fact, will only make them worse. Reallocation will hurt commercial fishermen and take red snapper off the plates of the American consumer.

It's time the Council followed the law and gave recreational fishermen the right tools to manage their fishery properly. Taking quota away from commercial fishermen is not a solution. Thank you for the opportunity to comment.

Date: Thursday, July 2, 2015 at 11:24:08 AM Eastern Daylight Time

From: Stephen Smith

To: Gulf Council

I am in vote for the option that yields the most advantage to the RECREATIONAL fishing season and opportunities. That option appears to be alternative 4 or 6. It bothers me that I only have very few short days to teach and fish with my children and family for the endangered red snapper that is taking over the Gulf. I do not care if I ever get to eat RS in a restaurant again, the recreational part where I can go out and enjoy Gods creation and keep fish for me and my family to eat that I catch off my boat should come first. Thank you, Steve

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 22, 2015 at 12:21:55 PM Eastern Daylight Time

From: Sylvia Duncan

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 1, 2015 at 2:19:26 PM Eastern Daylight Time

From: Galo Arguello

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Currently, commercial and recreational fishermen share the red snapper catch roughly 50-50 and there is no good reason to change that. Commercial and recreational fishing in the Gulf are both important economic drivers and we do not have to choose one at the expense of another. The National Restaurant Association lists locally sourced seafood as the #1 menu trend for the past four years in a row.

Hundreds of chefs, restaurant owners, seafood companies, trade associations, conservationists, fishermen and seafood lovers from all across the Gulf have already united in opposition to reallocation and decision makers should, too.

Please consider EVERYONE involved when making your decision.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Monday, June 1, 2015 at 11:47:17 AM Eastern Daylight Time

From: Emilie Maxey

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Jacob Weaver

To: Gulf Council

Dear Governor and Gulf Council Members:

Having grown up in a coastal region of Texas I know as well as anyone that snapper is an essential fish for chefs and home cooks alike. One of the reasons I support the Share the Gulf campaign is that it seeks more regulation of our fisheries, especially in the recreational sector which can only have good effects for snapper and other gulf species. It would be a massive failure of the system if myself and other chefs could no longer sell wild snapper on our menus and I think its important for the public to learn just how close we could be to that happening.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would begin the process of helping to protect Gulf of Mexico reef fishes like the Red Snapper from overharvest and exploitation by commercial interests. For too long fisheries have been managed to insure the profitability of a select few commercial interests in the Gulf of Mexico. Please approve this amendment and start the process of restoring the fisheries of the Gulf to full public access rather than limited special interest access for profit.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Thursday, March 26, 2015 at 10:06:30 AM Eastern Daylight Time
From: wadie wallace
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, March 25, 2015 at 9:30:01 PM Eastern Daylight Time
From: Karen Laakaniemi
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

I have no problem with recreational fishing but I do have problem in that there is no way to ensure the fishermen do not get too greedy and take more that they should. Also, when I purchase fish, I look for sustainable seafood. I also ask restaurants with fish on their menu is the fish they are serving is sustainable. I ALWAYS want to know from where and how the seafood is obtained.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: James Zurbrick
Re: Amendment 28 (Selectivity / Recalibration)

Gulf of Mexico Council Members,

Hope this finds you well in these difficult times. Most that were in attendance at the Biloxi council meeting were made aware of the Council preference for the Selectivity / Recalibration alternatives for the first time. It was apparent from the presentation that those pushing for this are trying to justify an allocation shift using poorly supported information and substantial assumptions. "Grasping for straws" was what I heard from many of the more educated stakeholders, those that are strong resource and industry advocates. As I have further looked at these alternatives I'm inclined to see the desperation that some on the Council are demonstrating, very sad to see in my 15 years in the Council process.

First I want to comment on the Selectivity alternative, the one that rewards bad behavior with more fish. It is the choice of the fisher to decide whether to keep larger or smaller fish but there must be consequences for mortality associated with culling. Just yesterday a local man in Steinhatchee just got back from the June 1st opening of Snapper in Pensacola, his comments to me were that snapper were thick and they got real nice fish but culled everything under 12 lbs. This gentleman admitted that the 5 anglers caught over 40 legal fish keeping their 10, they were fishing 130ft and he stated that they all live at that depth. We all know that this is very common practice within this Rec. sector and the Council's own SSC has identified concern with recreational discarding and the lack of accurate information about this impact.

The state of Florida touts on their FWC webpage that large Red Snappers lay many-many more eggs than the smaller ones, yet it boasts a state red snapper season that is not scientifically justified and allows an unlimited pool of private anglers to target larger red snapper?

As for the Recalibration alternative, this is prime example of cart before the horse. The Science Center has based its models on a shallow water (80-110ft) Red Snapper fishery; this has not been the case for many years, as we've heard at every Council meeting from fishermen talking about running farther offshore. The larger-faster offshore boats are now fishing farther offshore creating a much higher Recreational mortality rate than previously assumed. With the advent of GPS, faster vessels and internet info on fishing spots the models will have to be updated to compensate for this effort change. In addition the faster vessels can make more than 1 trip a day and the abundance of snapper near shore lets the smaller slower boats do more than 1 trip daily.

It is not in the best interest of the resource to move forward with any allocation shift especially without further analysis by the Science Center and SSC of the new alternatives and their impact on long term productivity of the resource, spawning stock biomass, and

spawning potential ratios. Please note that the resource minded stakeholders from the fishing industry stand ready to assist in helping the private angler sector develop a successful management plan that prevents over harvesting and promotes conservation while giving these fishermen more flexibility.

Sincerely
James Zurbrick

June 8, 2015

Mr. Kevin Anson, Chair
Gulf of Mexico Fishery Management Council
2203 North Lois Ave.
Tampa, FL 33607

Dear Mr. Anson:

Thank you for the opportunity to comment on Gulf of Mexico fisheries. We hope that the Gulf Council can focus this meeting on clearing the way for meaningful recreational red snapper and reef fish management reform by moving past the false promise of Amendment 28, continuing the progress made through Amendment 40 by initiating options papers for charter and headboat components of the for-hire sector, and tailoring Amendment 39 to meet the needs of private anglers.

Here are our recommendations:

1. Choose “No Action” as the preferred alternative in Amendment 28.

The rationale offered for Alternatives 8 and 9 is not credible. The recent addition of Alternatives 8 and 9 to Amendment 28 and the revision of its purpose and need suggest that the Gulf Council is determined to pursue reallocation to the recreational sector and is searching for justification. The Council has appropriately dismissed its prior emphasis on net benefits. Yet despite completely re-writing the amendment’s purpose and need as a result of that change, the Council has nevertheless retained all of the same management alternatives. The Council has now added two new reallocation alternatives on the basis of recent MRIP recreational landings calibration and stock projections, but both of these alternatives are flawed and the Council should reject them.

- *Reject Alternative 8:* The current preliminary MRIP calibration method suggests that recreational red snapper harvest in recent years is greater than what previously was estimated using the MRFSS methodology. We agree that MRIP presents the best available scientific information on recreational catch accounting at this time. That rebuilding has progressed since 2007 in spite of recreational overages that were larger than previously estimated suggests that the red snapper stock could have sustained higher ABC levels in recent years. This means the commercial/recreational sectors could have been allocated 51%/49% of higher catch limits. In contrast, to reallocate on the basis of recently revised recreational landings as estimated by

MRIP would be inconsistent with the Magnuson-Stevens Act's requirement that allocations ensure that quotas "do not reflect any harvests in excess of such allocations."¹ In addition, some have suggested that the difference in recreational red snapper effort estimated by MRFSS vs. MRIP methodology in recent years is consistent with long-term trends and may reflect the state of the fishery when commercial and recreational allocations were established. However, given the changes in management institutions, demographics, and data collection since that time, the usefulness of the calibration estimates decreases considerably for any comparison beyond very recent years.

- *Reject Alternative 9:* Fishery allocations should not be changed on the basis of recent changes in selectivity. According to a recent SSC report, "there is some evidence that recreational fishing selectivity in recent years has been shifting toward larger and older red snapper."² This shift in selectivity reflects a change in angler behavior, and "this behavior could change in response to changing allocations."³ There is no way of knowing if reallocation might cause recreational selectivity to stay constant, shift even higher, or shift toward smaller fish. These changes could have dramatic impacts on stock projections and allocations. To establish a precedent where allocations fluctuate with preliminary selectivity data would increase management uncertainty and would appear to incentivize high-grading.

Reallocation may contribute to localized depletion in the eastern Gulf of Mexico. We caution the Council to consider the impact of red snapper reallocation on the eastern Gulf of Mexico red snapper stock. In recent years, increasing catch limits have been sustained by rebuilding progress in the western Gulf of Mexico. According to the recent SSC report, "SPR in the western Gulf continues to increase, but the SPR in the eastern Gulf declines, and the decline is exacerbated by increasing allocation to the recreational sector."⁴ This is because most recreational fishing occurs in the eastern Gulf of Mexico. Increasing fishing effort in the eastern Gulf – where red snapper SPR has been in decline – while relying on continued western Gulf SPR increases to sustain overall rebuilding progress could contribute to localized depletion and does not appear "reasonably calculated to promote conservation."⁵

Reallocating red snapper quota will not bring stability to the recreational fishing season or reduce the likelihood of recreational overages. The Amendment 28 Draft Environmental Impact Statement (DEIS) analysis states "Alternatives 2-9 will not increase the stability of red snapper fishing for the recreational

¹ Magnuson-Stevens Act, 16 U.S.C. § 1883(d)(2).

⁵ Magnuson-Stevens Act, 16 U.S.C. § 1851(a)(4).

sector..."⁶ Season length projections are not included in the most recent DEIS for Amendment 28, but "the season is extended only nominally"⁷ and it is reasonable to conclude the increase in red snapper private angler and for-hire EEZ seasons would be a fraction of a day or a day or two at the most. On the other hand, the DEIS analysis suggests reallocation would destabilize the commercial red snapper fishery that is thriving with individual fishing quota (IFQ) management: "A reallocation from the commercial quota would be expected to negatively affect the stability of the commercial sector in terms of long term access to red snapper allocation and confidence in the IFQ program."⁸ The Council should not undertake an action that will destabilize one sector for marginal (if any) benefit to another sector. We strongly caution the Council to consider the destabilizing impact of red snapper reallocation on the commercial fishery, including the fishermen, suppliers, processors, markets, and consumers that depend on it.

The DEIS analysis also states "...quota overages and shortened seasons would be expected to continue in the recreational sector."⁹ In 2014 recreational red snapper harvest remained under its annual catch target. In part this is due to a new 20% management uncertainty buffer, but this does not address our concerns with Amendment 28. First, one season of successful quota compliance does not make a trend. With status quo recreational management and inconsistent state waters regulations seemingly unchecked (approximately half of the 2014 red snapper annual catch target was harvested in state waters under inconsistent state regulations),¹⁰ there is no reason to expect the trend of recreational overharvests not to continue. Second, reallocating would undermine the conservation impact that a buffer is intended to accomplish. Without a fundamental change in management that incentivizes accountability instead of punishing anglers and for-hire businesses with short seasons whenever the Council and NMFS fail to constrain recreational catch to quota, recreational quotas will continue to be subject to a large management uncertainty buffer, fishing seasons will remain short, and anglers and for-hire businesses will continue to be dissatisfied with management. Reallocation will not address these problems, as the DEIS itself makes clear.¹¹

Reallocating red snapper quota will not increase economic benefits of red snapper fishing. The Council's Socioeconomic SSC (SESSC) has advised that a new management approach for recreational fishing should be a higher priority than any consideration of reallocating quota from the commercial to recreational sector.¹² We have provided detailed comments on the weak policy relevance of Amendment 28 economic efficiency analysis in several previous letters to the Gulf Council and NMFS, and we incorporate those comments here by reference.

¹² Gulf of Mexico Fishery Management Council (2014). Socioeconomic SSC Meeting Summary. August 5, 2014.

2. Develop meaningful recreational management reform for Gulf of Mexico reef fish recreational fisheries.

The recent implementation of Amendment 40 is an important step toward developing management models that suit the different needs of for-hire fishing businesses and private anglers. With recreational red snapper management now moving in the right direction, the Council can build on this first step by developing effective management tools for the recreational reef fish quota and its sub-sectors. This would offer far greater improvements to fishing seasons and conservation than any reallocation.

First, we recommend that accountability measures such as uncertainty buffers and overage payback adjustments be sector-specific and tailored to management performance. That is, for-hire and private angling sub-sectors should have unique accountability measures reflecting differences in management uncertainty between the two groups.

Looking ahead, we have recommended new management models for the Gulf's for-hire and private angler recreational sub-sectors in several previous letters to the Council and NMFS. These tools could include individual fishing quotas (IFQs) or cooperatives in the for-hire sectors and harvest tags and angler management organizations (AMOs) in the private angler sector. The Council also has clear guidance from recent meetings of its ad hoc charter for-hire and headboat advisory panels, and we encourage the Council to build on these recommendations as you develop Reef Fish Amendments 41 and 42.^{13,14}

Develop allocation-based management plans for the charter and headboat components of the for-hire sector in Amendments 41 and 42. The Gulf Headboat Collaborative (GHC) pilot program has demonstrated that an allocation-based management plan for headboats can be successful. According to recent reports to the Gulf Council, allocated the same proportion of red snapper and gag their customers would normally catch in derby seasons, headboats participating in the GHC pilot program have:^{15,16}

- Dramatically spread out their allocations of red snapper and gag over the year to increase the number of fishing days
- Provided many more anglers with opportunities to fish for red snapper and gag
- Significantly reduced discards of red snapper and gag (by 43% and 59%, respectively)
- Successfully stayed under catch limits and facilitated superior monitoring and enforcement by using daily electronic logbooks, vessel monitoring systems, and quota transferability within the pilot program

Mr. Kevin Anson, Chair

June 8, 2015

Page 5 of 5

The pilot program is working well, and a similar management approach should be extended to all Gulf of Mexico headboats participating in the reef fish fishery. The Council has an opportunity to do this by advancing an options paper for Amendment 42 consistent with guidance from its headboat reef fish advisory panel. The same benefits should be extended to charter component of the recreational reef fish fishery. We recommend the Council encourage the two groups to move in the same direction but on distinct tracks via Amendments 41 and 42, which is consistent with advice from both its ad hoc charter for-hire and headboat advisory panels.

Dedicate regional management in Amendment 39 to the private angling component by selecting Alternative 2 in Action 2 as preferred, and improve the plan by allowing states the flexibility to manage using tools like tags and AMOs. We recommend that private angler recreational red snapper quota be managed under state authority delegated by the existing Council process. States can establish angler management organizations (AMOs) or manage allocations using harvest tags allocated by lottery, auction, or other systems. Using these tools, states can cater to differences among their coastal communities, provide year-round fishing opportunities, and effectively monitor fishery performance. Improved performance relative to conservation goals would lead to reduced uncertainty buffers and therefore higher catch targets and longer fishing seasons. We ask that the Council refine Amendment 39 so that it can provide these benefits for anglers while granting for-hire operators the opportunity to continue pursuing allocation-based management through Reef Fish Amendments 41 and 42.

Thank you for considering our comments and recommendations.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert E. Jones". The signature is fluid and cursive, with a large initial "R" and "J".

RE: Ocean Conservancy Comments on Actions before the Gulf of Mexico Fishery Management Council for Its June, 2015 Meeting In Key West, Florida

Dear Chairman Anson,

Ocean Conservancy¹ is pleased to offer the following comments and recommendations in anticipation of the June 2015 meeting of the Gulf of Mexico Fishery Management Council ('GMFMC', 'Council') in Key West, Florida:

- 1.) Council should **maintain the status quo allocation for Red Snapper under Amendment 28**
- 2.) Council should act to **exclude the charter-for-hire component under Amendment 39**
- 3.) Council should adopt the recommendations of the Charter-for-Hire and Headboat APs and **continue to develop Amendments 41 and 42**
- 4.) Council should heed the advice of the SSC and **maintain the Red Snapper SPR at its current rate**
- 5.) In light of significant compounding scientific uncertainty, council should **make no increase in catch limits for Gag Grouper**

Each of the above items is discussed in greater detail in the sections below. As always Ocean Conservancy appreciates the Council's open policy in accepting public comments, and we respectfully request that this letter be included in the briefing materials for the Key West meeting.

¹ Ocean Conservancy, a non-profit organization with offices in Florida, Louisiana, Texas, California, Oregon, Alaska, and Washington, D.C., educates and empowers citizens to take action on behalf of the ocean. From the Arctic to the Gulf of Mexico to the halls of Congress, Ocean Conservancy brings people together to find solutions for our water planet. Informed by science, our work guides policy and engages people in protecting the ocean and its wildlife for future generations

1.) Council should **maintain the status quo allocation for Red Snapper under Amendment 28**

Ocean Conservancy cautions that the appropriate approach to the reallocation question posed in Amendment 28 is to retain the current 51% commercial 49% recreational quota split. It would be premature to adjust the allocation at this juncture as this would shift quota from an accountable and responsible commercial fishery to a historically unaccountable recreational fishery.

Last year's *Guindon v. Pritzker*² decision, which forced the Gulf recreational red snapper fishery into compliance with the Magnuson-Stevens Fishery Conservation and Management Act ('MSA')³, made great strides in ensuring accountability that will hopefully limit the likelihood of future quota overruns. While accountability measures for the recreational sector are a step in the right direction for future seasons, the fact remains that the recreational quota has been exceeded 21 of 23 seasons from 1991 to 2013 (including in the recent 2013 season).

While there are indications that the *Guindon* mandated accountability measures are working to curb the likelihood of quota overruns, there is still a possibility based on the overages from previous seasons that the recreational sector might exceed its share of the catch.

Until it is reliably demonstrated that the accountability measures are working for the recreational sector it would be untimely to transfer a greater share of quota to that fishery. It is also important to point out that shifting allocation to the recreational sector will do little to increase the red snapper season, which is ultimately what the fishermen on the water are seeking. If the recreational fishery is to enjoy longer federal-water seasons, the council should explore new management ideas that will help the anglers. More comprehensive data collection can improve accountability and prevent the sector from exceeding its allowable catch, but other solutions should be addressed, too, beginning with state consistency that would allow greater federal-water access for all anglers and allowing managers the stability to place durable and resilient private angler management tools into place. Improved accountability in the private recreational fishery is the first step to more days on the water for anglers while also ensuring that red snapper rebuilding efforts continue to be successful.

Ocean Conservancy urges the Council to take a precautionary approach by maintaining the current allocation, as this would best support continued rebuilding of the stock by not risking larger and more impactful quota overruns by shifting a portion of the allocation to a historically unaccountable sector.

2.) Council should act to **exclude the charter-for-hire component under Amendment 39**

We urge the Council to select Alternative 2 in Action 2 of Amendment 39, Regional Management. This would remove the charter-for-hire component from the regional management concept and by default would have the amendment apply exclusively to the private recreational fishing component.

Taking this action would preserve the achievements made in Amendment 40, Sector Separation, and would have the long term impact of providing more flexible and narrowly tailored management tools for the private recreational component. As seasons are substantially throttled due to blatant state non-compliance for the private recreational component, better solutions are needed to provide relief to private recreational fishermen to ensure quotas are not exceeded and progress continues in rebuilding the red snapper stock. The best option for recreational fishermen is to allow the individual states to tailor management needs to their fishermen, while enough oversight is retained by federal managers to ensure conservation equivalency and that rebuilding efforts continue.

In addition, Amendments 41 and 42, which are currently under development, will provide discrete management tools for the charter-for-hire and headboat recreational red snapper fisheries respectively. Forcing the charter component to remain under Amendment 39 would limit important progress that has been made

² *Guindon v. Pritzker*, 31 F.Supp. 3d 169 (D.D.C. 2014).

³ 16 U.S.C. §1853(a)(15).

that allows for flexibility in charter-for-hire seasons and will make it more difficult to assess the source of any future quota overages that jeopardize rebuilding and the continued health of Gulf of Mexico red snapper.

- 3.) Council should adopt the recommendations of the Charter-for-Hire and Headboat APs and **continue to develop Amendments 41 and 42**

Ocean Conservancy recommends that the Council instruct staff to continue work on the burgeoning Amendments 41 and 42 that would apply carefully tailored management provisions to the individual charter-for-hire and headboat components of the recreational red snapper fishery. By creating component specific management measures for these subunits of the recreational fishery, the whole recreational fishery will benefit in that quota overruns will become rarer as the charter fisheries become more accountable.

The meetings of both the charter-for-hire and headboat Advisory Panels yielded forward thinking management tools for these fisheries, including novel ideas for data collection and reporting, and council should give strong credence to the panels' recommendations and incorporate them into a scoping document that will give forward momentum to the ultimate passage or approval of Amendments 41 and 42.

- 4.) Council should heed the advice of the SSC and **maintain the Red Snapper SPR at its current rate**

Ocean Conservancy recommends that no change be made to the red snapper Spawning Potential Ratio ('SPR') reference point and that the level remain at 26% per the guidance of the Scientific and Statistical Committee ('SSC')

We caution that lowering the SPR reference point comes with considerable scientific and biological risk. A lower SPR allows for a younger stock that has less reproductive potential per individual and that is more susceptible to fluctuations in recruitment, which is problematic since red snapper recruitment is highly variable and uncertain. Estimates of long term maximum sustainable yield at lower SPR levels assume recruitment will look the same as it does now, even at a lower reproductive capacity. Furthermore, SPR values for long lived fish with low natural mortality are typically set between 30-40%. Lowering the SPR for red snapper below 26% bucks this convention and is not justifiable from a scientific perspective.

In agreement with the recommendations of the SSC, there is insufficient scientific evidence for lowering the red snapper SPR beyond 26% and we underscore that any lowering of the SPR will produce significant biological risks that may jeopardize rebuilding successes that have been realized for red snapper to date. In addition, because SPR for long lived low natural mortality fish such as red snapper is traditionally set somewhere between 30-40%, if the council is to consider making any adjustments to the red snapper SPR we urge that an adjustment upward to between 30-40% is the scientifically appropriate action to take.

- 5.) In light of significant compounding scientific uncertainty, council should **make no increase in catch limits for Gag Grouper**

Although council currently has the opportunity to increase the ACL for gag grouper, Ocean Conservancy strongly urges Council select the no action alternative that would maintain a status quo approach for this stock.

The status quo approach still includes a modest increase (10%) from 2014 in the ACL and ACT for the 2015 and onward seasons based on an ACL and ACT approach for gag established in Amendment 32 in 2011. It is worth noting that because of the moderate increase already in the status quo there is a possibility for expanding the existing gag season. Beginning the season in June based on this quota increase would allow for improved access for fishermen and would likely not carry the same risk and uncertainty as the other alternatives in the framework adjustment.

On the water, fishermen from both the commercial and recreational sectors are worried about the health of the stock as they have simply not been catching gag reliably or as expected. Plus, as recently as the 2014 season,

neither the commercial or recreational sectors have been able to catch the entirety of their quota. Recent analysis conducted by the Southeast Fisheries Science Center, reviewed and confirmed by the SSC, shows that gag recruitment levels are at a record low and that estimates of abundance are declining after the last assessment. In addition the SSC's analysis of updated data confirmed that the projections in SEDAR 33 were overly optimistic and the stock is likely not as healthy as the assessment indicated.

The SSC has recommended by unanimous consent that the council needs to be cautious when setting catch limits for the stock. There is a gag update assessment scheduled for the end of next year, however early indications from the SSC show that there is strong likelihood that the stock is in decline.

It is also important to note that the Reef Fish AP recommended that Council take a conservative approach with respect to gag, as what the fishermen were seeing on the water did not coincide with the curiously optimistic projections in the stock assessment.

Both scientific and on-the-water evidence continues to mount in favor of keeping a status quo approach for gag, and Ocean Conservancy strongly encourages the council to heed the advice of the SSC and the Reef Fish AP.

We truly appreciate the opportunity to give comment on these issues and we encourage you to contact the undersigned directly should you have any questions or concerns.

Sincerely,

s/ Jon Paul (J.P.) Brooker, J.D.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Date: Sunday, March 29, 2015 at 6:54:56 PM Eastern Daylight Time

From: Mary-jo Rubin

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Brian Wyatt

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28"

The Snapper industry (Commercial) should be CUT to bare minimum. The Tax payers(Recreational Fishermen) who actually own the Red Snapper in the Gulf of Mexico have had the short end of allocation for WAY TOO LONG. I feel that anyone who actually profits MONEY from a Public owned resource should have very little to Zero say about how the resource is allocated. The entire Snapper management has been a total fiasco due to the Enviro's and commercials Smearing Lies to any politician who would accept donations from them. It's time we have the Snapper given back to who Actually OWNS them. And Start taking the Snapper away from those who Profit from Selling them. Mr Abbott, I know you have visited with a few of these guys trying to Railroad the Recreational fishermen off the water when it comes to Snapper (Billy Jarvis, Mike Jennings) but truth is these guys are merely stacking the deck for their own wallets.

Please do something for real Public, The recreational fishermen and start cutting the Commercials out who have actually created the problem all along in disguise.

Sincerely,

Brian Wyatt

A south Texas recreational fisherman Who voted for you.

From: Craig Burch

To: Gulf Council

Dear Governor and Gulf Council Members:

Thank you for taking the time to consider public input on fisheries management issues. The Red Snapper fishery has been grossly mismanaged by the Gulf Council. The methodology for both assessing the fish stocks as well as measuring the true amount of recreational landings have both been shown to be fatally flawed. Despite this fact, this information is still being used. Furthermore, members of the council have been shown to have lied on required public disclosure documents. It is apparent that certain well connected groups get what they want while the recreational fisherman gets nothing. This is untenable and absolutely disgusting. The only true fix for this mess is to scrap the entire convoluted system and start over.

In order to begin fixing the horrible mess you have created I humbly request that each and every member of the Gulf Council resign immediately. If you won't do the right thing, then I call on the governors who make the appointments to fire any council member from their state and appoint new members.

This fiasco has gone on long enough and needs to be stopped.

Thank you,

Craig Burch

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, March 25, 2015 at 1:16:34 PM Eastern Daylight Time
From: Diane Gumpel
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, March 25, 2015 at 12:19:16 PM Eastern Daylight Time
From: Laban Burns
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

I live in North Louisiana, but recreationally fish areas the Gulf and its Bay area 3-4 times per year. I am very familiar with the issues at hand that affect local fishermen and small businesses who depend on non-commercially caught seafood.

With a unanimous vote from the committee charged with representing the citizens of the areas affected, I urge and plea for the following:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, December 10, 2014 at 8:35:36 PM Eastern Standard Time
From: martha burton
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: david radden
To: Gulf Council

Dear Governor and Gulf Council Members:

Although we live on the Gulf, we see very little locally caught seafood in the nearest grocery stores. "Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, December 10, 2014 at 4:17:21 PM Eastern Standard Time
From: Heidi Bernaldo
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Attention: Gulf Management Council

We are Darden, the world's largest full service restaurant company. We own and operate over 1,900 restaurants with seven brands in North America being: Red Lobster, Olive Garden, LongHorn Steakhouse, The Capital Grille, Season's 52, Bahama Breeze and Eddie V's. We serve over 400 million meals a year, employ over 180,000 people and our sales are approximately \$8 billion a year.

Seafood is on every one of our restaurant menus. It is in our best interests, both from a core value perspective as well as a business perspective, that seafood is harvested in a sustainable manner for today and for future generations. For our company to thrive, we need a steady and reliable supply of top-quality fish and shellfish to serve to our guests. We also have a responsibility to do our part to maintain healthy and productive ocean ecosystems. To that end, we were a founding member of the Global Aquaculture Alliance, an organization that sets sustainable standards for best aquaculture practices. We are also conducting a fisheries improvement project in the Gulf of Mexico which will improve the data collection and management of the snapper and grouper fisheries. We helped establish the Atlantic Lobster Sustainability Foundation, a nonprofit organization with the goal to preserve and enhance a viable sustainable lobster industry. And, those are just a few of our initiatives.

We respect and appreciate the great efforts of NOAA and the Gulf Management Council in establishing the catch share program for the US Gulf of Mexico. The catch share program has shown to eliminate overfishing and achieve annual catch limits, improve fishermen's safety and profits, and reduces the negative biological and economic effects of regulated fisheries that don't use catch share programs.

While we support the catch share program we believe there are areas within the structure of the quota allocation that, if amended, would provide the fishery with more equitable allocation of quota. A more equitable allocation of quota would accomplish three goals:

- Support an essential catch share program goal of encouraging fisherman to own a share of the fishery and, therefore, be more responsible in the management of the resource
- Remove the ability of the quota holders to manipulate market pricing by restricting or loosening quota
- Build an architecture that will be economically viable to future fishermen so that fishing in the Gulf can be a consideration as a future career choice

We believe the most appropriate way to achieve these objectives is to allocate catch share quota only to fisherman fishing the quota. Quota should not be owned or sold by absentee owners neither should quota be attached to a vessel. By enacting this consideration, the catch share program will provide more consistent fishing standards, a more stable market, and more predictable and manageable costs for the consumer. The individuals fishing the quota will be incentivized to be more responsible for the sustainability of the resource and provide younger generations the hope and ability to own quota and fish the US Gulf of Mexico as a career.

We also recommend for consideration a review of the Gulf of Mexico recreational sector quota. This sector is allocated a very large portion of the red snapper quota, almost equal to that of the commercial sector; however, they do not have the reporting requirements that the commercial sector does. Additionally, some stocks in the Gulf of Mexico, including red snapper, are not on target to be rebuilt in 10 years, as is mandated by the Magnuson-Stevens Act. Calling for improved data collection and monitoring from recreational fishers and shorter rebuilding plans within 10 years could lead to clear benefits to the resources.

We suggest that these two proposals for consideration are essential elements of a sustainable fishery.

Thank you for your consideration in addressing this amendment to the current catch share quota allocation process.

Sincerely,

Roger A. Bing
Vice President
Seafood Purchasing

Mr. Bob Gill, Chairman
Gulf of Mexico Fishery Management Council
2203 North Lois Avenue
Tampa, Florida 33607

Dear Mr. Chairman:

Southeastern Fisheries Association (SFA) respectfully requests the Gulf of Mexico Fishery Management Council to examine all aspects of the letter from a national anglers lobbying group, signed by a Mr. Brewer, pertaining to reallocation of the nation's fish. We intend to submit an equitable reallocation plan for our sector and the nation's millions of non-boaters, who depend on professional fishermen, licensed and accountable under all requisite state and federal regulations, for their share of sustainable, wild harvested domestic seafood products.

SFA trusts all members of all Councils will adhere to and abide by the federal fishery law they are obligated and paid to uphold. The reasons for passing the Magnuson-Stevens Fishery Conservation Management Act (FCMA) are easily understood by reading Sec. 2 (a) (1) of the act, which clearly, concisely and correctly states food supply to the Nation is number one and providing recreational opportunities follows. Nowhere in the History of the act, or in the words of the law, is there any authority giving the majority of our nation's seafood supply to anglers. I can assure you, as an active participant in the development and passage of the Magnuson Act, Senator Warren Magnuson and Senator Ted Stevens did not create this all-encompassing public policy for anglers. Heed the words of FCMA, not verses or phrases recently written by revisionists who are not well informed on the full history of FCMA.

SFA and a host of other professional associations have established a working relationship with some of the angler groups, who do not have the goal of banning all professional fishing. We will continue to pursue this with any group willing to work for equity.

The FCMA was conceived and created to remove foreign fishing mostly in New England, stop Russia from harvesting US salmon and to provide a steady supply of seafood to the citizens of this country and provide recreational opportunities as shown by the following.

FCMA SEC. 2. FINDINGS, PURPOSES, AND POLICY 16 U.S.C. 1801

(a) FINDINGS.--The Congress finds and declares the following:

(1) The fish off the coasts of the United States, the highly migratory species of the high seas, the species which dwell on or in the Continental Shelf appertaining to the United States, and the anadromous species which spawn in United States rivers or estuaries, constitute valuable and renewable natural

Mr. Bob Gill – page 2

resources. **These fishery resources contribute to the food supply, economy, and health of the Nation and provide recreational opportunities.**

It's been suggested one militant angler group has the votes pledged from members of the Gulf of Mexico Council and South Atlantic Council to reallocate most of the consumer's fish to their pleasure fishing sector through sheer political power. If any Council member allows any user group to commandeer increased allocations of fish from the non-boating consumer's allocation by improper or unethical political machinations, they should be replaced for not complying with the covenants of federal law.

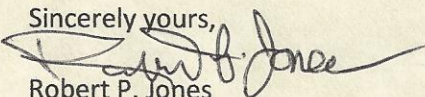

Before any discussion occurs turning this reallocation conflict into "FISHGATE", we suggest the Council create charts and graphs of fish harvested by user group/species from 1976 to 2012. Additionally, the Council should prepare a two-page report showing what user group gets the fish today and how disproportionate it is in many fisheries. Send this information to all interested parties for comments and suggestions. Show the general public exactly what percentage and pounds of fish the consumers get and what percentage the anglers get at the present time.

Several angler and environmental groups have demonized the commercial fishermen for decades painting "commercial" fishermen in an ugly light. In the future we request the allocation pageant refer to us as CONSUMERS/COMMERCIAL FISHERMEN.

Our historical seafood industry is composed of fish dealers, fishermen, processors, boat builders, trucking companies, seafood restaurants, shore side maintenance facilities, box manufacturers, public and private cold storage freezers and the list goes on and on. Our industry urges the Council not to be bullied into carrying out the policy and goals of any group. The fish belong to all the people in America, not just those who belong to anointed angler or environmental groups.

Thank you for considering our views. We respectfully ask that every Council member work in a manner giving everyone due process and the rule of law prevail in all final decisions.

Sincerely yours,

Robert P. Jones
Executive Director

ALLOCATION OF FINFISH IN THE GULF OF MEXICO UNDER FISHERY MANAGEMENT PLANS MANDATED BY THE MAGNUSON ACT OF 1976 AND AMENDED IN 2006.

The environmental community, especially Pew Trusts, Environmental Defense Fund and the Ocean Conservancy have targeted commercial fishermen as the cause of all ills in the ocean environment. From the fisherman's perspective, these groups, and fishing organizations they have formed and fund, perpetuate their goal of removing as many commercial fishermen from the oceans as possible. Fish stocks managed in the United States federal waters are not undergoing overfishing according to the National Marine Fisheries Service.

There is nothing the fishermen can do to stop environmental groups from saying anything they wish to accomplish their goal of reducing fishermen, but the fishermen can and should provide facts to the general public for their perusal instead of just believing what the anti-commercial fishing groups espouse.

There are several angler groups masterfully using misinformation to force government fishery managers to fear them politically and then allocate most of the fish to them. How nice it would be to sit together with a few non-confrontational environmental leaders to discuss the total lack of stock assessments in the southeast and the great need for improvement of science used to manage our lives. That is a goal them might be too far away to achieve, but we are willing to come half-way.

Examine the table below. If you find an error please call it to my attention. The figures are from government sources, primarily fishery management plans in place for FEDERAL waters of the Gulf of Mexico.

SPECIES ANGLER ALLOCATION COMMERCIAL ALLOCATION (fish made available to consumers)

BLUE MARLIN	100%	0%
WHITE MARLIN	100%	0%
SAILFISH	100%	0%
REDFISH	100%	0%
AMBERJACK	73%	27%
KING MACKEREL	70%	30%*
GAG GROUPER	65%	35%
RED SNAPPER	49%	51%
RED GROUPER	24%	74%

FLORIDA STATE WATER FISH ALLOCATIONS

BILLFISH	100%	0%
SNOOK	100%	0%
REDFISH	100%	0%
TROUT	98%	2%

* Not sure of king mackerel because it's managed jointly, but this was the approximate split in the Gulf of Mexico in the past.

The Economic Evaluation of Grouper Allocations presented by Mr. Agar and Mr. Carter at the Corpus Christie council meeting was totally the wrong way to determine the value of commercial grouper. Fishermen pay from \$.50 to \$.60 a pound for red grouper allocation in order to catch that pound of fish. How can they use that as the value of a pound of red grouper when the consumer is willing to pay \$25.00 for a grouper dinner and only get a half of a pound on their plate.

Using the price of IFQ *shares* is a more realistic method than using allocation prices. Red snapper shares are selling for \$35.00 a pound. Shares are what a fishermen strives to acquire because they give him the privilege to catch that fish every year. Even though the council's Principles of Allocation states that economic allocation should not be the *sole purpose* of allocation, the economic evaluation of a commercial fish to a recreational fish should at least be accurate.

Section b. 1. of the council's Principles for Allocation states, "Suggested methods for determining reallocation should be *accountability* (a sector's ability to keep within allocation)."

By continuously overrunning their quota over the years, the recreational sector has effectively already reallocated more fish to themselves, to the detriment of the commercial sector and more importantly, to the fish stocks and the American consumer.

Powerful recreational groups want to take fish away from the commercial sector. They are hiding behind the pretence that everything has to revolve around economics and money. Whether the recreational angler population is growing or not, we live in a world of limits. The Gulf Council sets the harvest limits and each sector should abide by those limits.

What about American citizens who can't afford boats, and depend on the commercial fishery to eat healthy seafood. *Food has always been more important than playing*. Why should fish be taken away from the working fisherman who is trying to feed his family and the American consumer and awarded to an elite group of people who have money and time to spare?

If this Council chooses to reallocate; don't take fish away from one sector and give them to the other. Let each sector *earn* its share of fish. Keep the allocation split between each sector *just as it is now*, and each year thereafter whichever sector exceeds their quota should have a payback provision to make them accountable. It is not just about fishermen, be it recreational or commercial; it is also about the American consumer. After all, Magnuson Stevenson advocates the maximum benefit to the nation, not just to people who can afford pleasure boats.

Jim Clements
Commercial fisherman
Carrabelle Fl.

The Case for Grouper and Snapper Re-Allocation

A recent presentation to the socioeconomic science and statistical committee (SESSC) of the Gulf of Mexico Fishery Management Council by two NOAA Fisheries Service Economists showed that recreational value for grouper far outstrips commercial value in the grouper fishery. These economists concluded that the current allocation is economically inefficient and to increase efficiency and maximize the value to the nation, the allocation should be moved towards the recreational sector. Yet the SESSC refused to recommend changing the allocation substantially or even recommending that the council should develop a plan to change allocations in this fishery. This prompted CCA to compile all the grouper and red snapper valuation estimates published in the literature and provided in Table 1. The estimates presented to the SESSC are detailed in NMFS 2011 and Carter and Liese (2012).

Table 1. All Existing Grouper and Red Snapper Values.

Authors	Year	Species	Commercial Value	Recreational Value	Supports Re-Allocation to Recreational Sector
Haab, T.C. et al.	2000	Snapper - Grouper		\$7 - \$8/fish	Yes
Gentner, B.	2004	Red Grouper		\$19.37/pound	Yes
Gentner, B.	2004	Gag Grouper		\$19.27/pound	Yes
Johnston et al.	2006	All Fish Species		14.33/fish	Yes
Carter, D.W. et al.	2008	Grouper (all)	\$1.14/pound	\$1.33/pound	Yes
Haab, T. et al.	2009	Grouper (all)		\$32 - \$98/fish	Yes
Gentner, B.	2010	Gag Grouper		\$13.58/pound	Yes
Gentner, B.	2010	Red Grouper		\$13.51/pound	Yes
NMFS	2011a	Gag Grouper	\$0.95/pound		Yes
NMFS	2011a	Red Grouper	\$0.69/pound		Yes
NMFS	2011a	Deepwater Grouper	\$1.09/pound		Yes
NMFS	2011a	Shallowwater Grouper	\$0.97/pound		Yes
Carter, D.W. and C. Liese	2012	Grouper (all)		\$26-\$80/fish	Yes
Gillig et al.	2000	Red Snapper		\$20/fish	Yes
Gillig et al.	2003	Red Snapper		\$7/fish	Yes
Haab, T. et al.	2009	Red Snapper		\$108/fish	Yes
Griffin et al.	2009	Red Snapper		\$52-\$155/day	Yes
Carter, D.W. and C. Liese	2012	Red Snapper		\$20-\$63/fish	Yes
NMFS	2011b	Red Snapper	\$2.76/pound		Yes

From Table 1, commercial values for various grouper species range from \$0.69/pound to \$1.14 per pound with the lower values from NMFS 2011a being more accurate as they are from market transactions in the grouper quota lease market whereas the Carter et al. (2008) estimates are derived from an econometric model. Commercial values for red snapper were \$2.76/pound as taken from quota lease transactions in NMFS 2011b. Recreational values range from a conservative \$1.33/pound to \$19.37/pound for grouper. Several of the studies did not denominate the value by the pound and instead denominated the value per fish. In these cases, value per fish ranged from \$7/fish to \$98/fish for grouper and from \$7/fish to \$108/fish for red snapper. To address detractors that have problems with the MRFSS data, the Johnston et al. study compiled 391 estimates across 48 different studies using all varieties of recreational data to develop the average across all fish species of \$14.33/fish. Using the 2011 MRIP catch estimates, the average gag grouper weighs 7.14 pounds. Applying this estimate to the Johnston figure generates a value per pound in the \$2/pound range for grouper supporting re-allocation when taking the average value across all species found in the literature. Griffin et al. (2009) simulated a market for red snapper shares and in this simulation the recreational sector would purchase the entire commercial allocation.

The evidence is overwhelming. Across all studies that have examined commercial and recreational value, recreational value exceeds commercial value. All studies consistently show that the current allocation is inefficient and that efficiency would be increased if recreational allocations were increased. Isn't it about time that the council addresses this inefficiency and begins managing these fisheries to maximize their value to the nation?

There is too much emphasis by the council focused on making sure commercial fisherman are making enough money at the expense of recreational bag limits and closures.</p> <p>There should be no commercial fishing allowed for any species that is considered overfished and recreational fisherman should be given priority over commercials in regards to allocation amounts. There should be no commercial fishing for gag at all if gag is going to continue to have closed rec seasons and ridiculously low limits.</p> <p>All of the recreational fisherman I know are sick and tired of getting the short end of the stick by the council while the commercial fisherman are being given priority</p> <p>Red grouper should be 76% recreational and 24% commercial..</p>	Palm Harbor, Florida 34683	Private Recreational Angler

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Friday, December 12, 2014 at 12:42:50 PM Eastern Standard Time
From: josefa arana
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

From: Brenda Murray
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

We and so many others live in the Gulf coast of Florida, not to mention the HUGE amount of TOURISTS that flock to Florida for FISHING!!

This is BIG BUSINESS HERE & the reallocation scheme for red snapper is NOT a good solution!
PLEASE focus on the PEOPLE WHO LIVE HERE, who will start moving away and the TOURISTS who will STOP coming here. THAT would be devastating to the ENTIRE STATE!!!

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, December 10, 2014 at 10:20:07 PM Eastern Standard Time
From: Mr & Mrs Dennis Roderigues
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)
Date: Wednesday, December 10, 2014 at 6:42:46 PM Eastern Standard Time
From: Elizabeth Nicolini
To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

To: Gulf Council

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

On a personal note, I recently went on an offshore charter fishing trip where a group of 18 fisherman caught over 100 Red Snapper, and had to throw them all back. I would not go on a trip like this again due to the great expense, and since we were not able to keep many fish. Thus is bad for the economy and the charter boats.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

Subject: Oppose the Red Snapper Reallocation Scheme (Amendment 28)

Dear Governor and Gulf Council Members:

"Amendment 28" would hurt small businesses and families along the Gulf coast by cutting nearly half a million pounds of popular red snapper from the consumer market in 2015 – and even more in the future.

"Amendment 28" is a false promise to recreational fishermen who will not experience long-term stability or longer seasons as a result of this change.

This "reallocation" proposal is divisive, unfair and comes at a time when demand for local and sustainable seafood is at an all-time high.

Please oppose Amendment 28 and focus on real solutions for recreational fishermen that will actually extend seasons for anglers over the long-term instead of schemes that hurt the seafood industry and consumers.

The state of Florida counts on tourism, we must have fishing available to our visitors. We count on this for our economy and jobs.
