MEMORANDUM

TO: Doug Gregory, Executive Director, GMFMC
FROM: Julie A. Neer, SEDAR Coordinator
DATE: May 16, 2018
RE: Terms of Reference Approval for SEDAR 64, Southeastern U.S. Yellowtail Snapper

SEDAR 64 will provide a benchmark-track assessment of Southeastern U.S. Yellowtail Snapper. The Data Workshop will be held February 25 – March 1, 2019, the assessment webinars will be held between April and July 2019, and the Review Workshop will be held September 10-12, 2019.

As the Cooperator is responsible for appointing individuals to participate in all components of the project according to South Atlantic Council SEDAR procedures, I am requesting the appointment of participants for the Panels and Processes associated with SEDAR 64.

The suggested maximum number of participants for each Panel is as follows:

Data Workshop Panel: 10 participants (SSC, AP, other data providers)

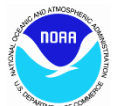

Assessment Panel: 6 technical participants (SSC, other scientists) plus up to two industry/other representatives to serve as official observers

Review Workshop: 2 SSC members, plus up to two industry/other representatives to serve as official observers

Ideally, appointees will be providing data, and/or have insight and assessment expertise, which will aid the assessment process. Additionally, it would be very helpful if some of the appointees could participate in both the Data and Assessment portions of the process.

I would appreciate it if this request could be included for discussion at your earliest convenience. Please inform me of the results of your consideration by June 29, 2018.

Thank you for your attention to this matter.
