2 – NMFS Staff Members – TBD

Staff Representative: **Lisa Hollensead**

The mission of the Ecosystem Technical Committee is to incorporate ecological interactions into stock assessments and management goals based on objectives set forth by the Council. The Ecosystem Technical Committee will work with Council staff to support the development of the Council's ecosystem-based fishery management plan. This plan will accommodate regional needs in the Gulf of Mexico while considering the existing National Ecosystem Plan and Regional Ecosystem Roadmap guiding principles.
