

Something's Fishy with Yellowtail Snapper

Fisheries management recommendations made by the Gulf of Mexico Fishery Management Council are based on scientific stock assessments, social and economic factors, and advice from our stakeholders. The Council actively gathers input from fishermen and other constituents on proposed management measures through the use of Advisory Panels and through scoping and public hearings.

The Council would like to expand the type of information it gathers to gain a better understanding of what's happening on the water. The Council recognizes that as active fishermen, you may notice trends or strange things happening in the Gulf that the scientists and managers may not be aware of yet.

A scientific stock assessment of yellowtail snapper is scheduled to begin in early 2019. We would like to know if you have noticed anything "fishy" about yellowtail fishing in recent years. The information you provide will help to inform the scientists and managers as they formulate a current understanding of the yellowtail snapper stock.

* Required

1. **Email address ***

.....

2. **FIRST Name ***

Please enter your first name only

.....

3. **LAST Name ***

Please enter your last name only

.....

4. **Association with the Fishery ***

Check all that apply.

- Private Recreational
- Federally Permitted For-Hire
- Commercial
- Other:

SPECIES: Yellowtail Snapper

5.

Certification *

Check all that apply.

I certify that the information provided is accurate to the best of my knowledge

6.

What gear do you use to target yellowtail snapper?

Mark only one oval.

Hook and line

Spear

Net
