Action Guide and Next Steps for Tab P**

Agenda Item IV: Essential Fish Habitat 5-Year Review

Timeline Status: Presentation and Discussion

Council input and next steps: The Council completed and submitted their 5-year review of Essential Fish Habitat in 2017. NMFS has reviewed this report and will provide a summary of their findings and recommendations. The Committee should review the recommendations and determine if it is necessary to modify the current EFH descriptions for one or more of the Council's FMPs through a subsequent management action.
