

Vessel Monitoring System (VMS)

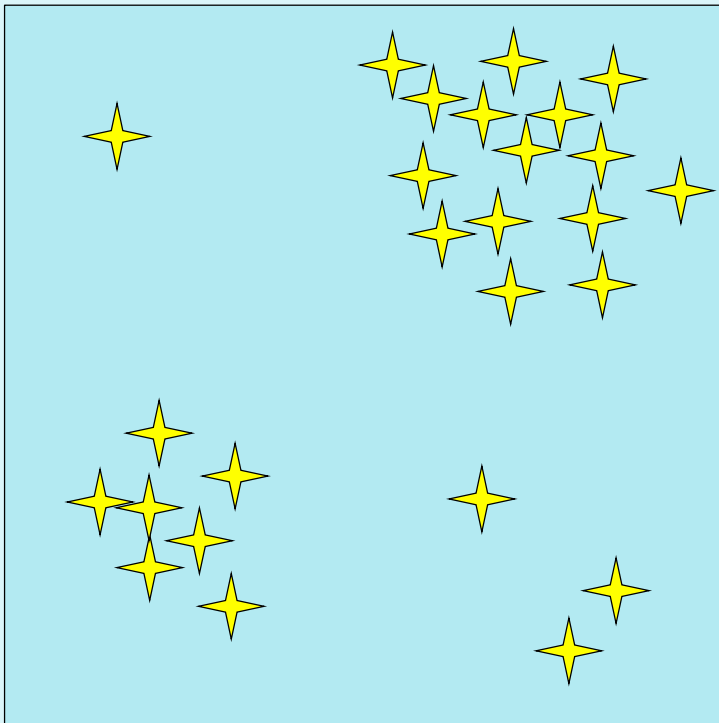

- VMS units are required on all vessels with commercial reef fish permits
 - Logs vessel ID and location once per hour
 - Includes both fishing and non-fishing points
- Data included for all bottom-tending gear (e.g., bottom longlines, automatic reels, bandit rigs)
- Data presented for March 2007 to July 2015

Vessel Monitoring System (VMS)

- Data are aggregated by sample size and location
