Assessments are listed by priority. There are FOUR slots annually for Gulf assessments with the SEFSC. Assessments listed in *italics* do not yield management advice.

Outstanding Requests:

1. Change MRIP Updates for Gag and GAJ in 2018 to full update assessments
2. Assess Spanish Mackerel in 2018 with HMS analysts
3. If #1 and #2 are not feasible, SEFSC to propose species to assess as alternative

Notes:

1. Vermilion Snapper moved to 2020 due to sample processing limitations and analyst availability
2. Data Poor assessment removed in 2020 to accommodate Vermilion Snapper S
3. Yellowedge Grouper and Tilefish removed to accommodate Red Snapper and Cobia in 2019
