

**INTEGRATING  
NATIONAL ENVIRONMENTAL POLICY ACT  
COMPLIANCE  
INTO A  
REAUTHORIZED MAGNUSON-STEVENSON ACT**

*A Council Coordination Committee Concept White Paper*

February 2015

**With GMFMC staff comments**

## Introduction

Fishery management involves fairly rapid cycles of adaptive management in which information about changing conditions is addressed through adjustments to the management program. In this setting, there has long been criticism that meeting the requirements of the National Environmental Policy Act (NEPA) has caused delays and introduces requirements that duplicate those in the Magnuson-Stevens Act (MSA) and other applicable law. Current rules, guidelines, and directives to comply with NEPA for marine fishery management actions has been overly expensive in terms of workload to both Council and National Marine Fisheries Service (NMFS) staff resources, with negative opportunity costs on other regulatory activities. There have been instances where current compliance with NEPA has hindered adequate compliance with MSA in terms of providing comprehensive analysis to Councils prior to their taking final action; there also have been instances of alternatives to possible action on a particular fishery issue being added or refined in the NEPA analysis document after final Council action, that are taken into consideration in the Secretarial review process executed under the MSA. **((Provide more specifics or examples of the indicated problems above.))** The Council Coordination Committee (CCC) recommends integrating the policy objectives and key requirements of NEPA into the MSA, aligned in a timely manner, as a way to address these problems.

The delays in implementing fishery management actions as a result of current NEPA compliance protocols can be significant. Figure 1 shows contemporary timelines for accomplishing the current guidelines and procedures for NEPA, MSA, **((Process for GMFMC is different, we cannot take final action before the DEIS comment period has ended, except in rare occurrences, like a non-controversial action.))** and the Administrative Procedure Act (APA), assuming the preparation of an environmental impact statement (EIS).<sup>1</sup> This figure is intended to illustrate the prolongation of the Secretarial review process after final Council action is taken under the current MSA process, and thus delay in implementation of any fishery management action. It can be seen that all three statutes require separate public comment periods, which is duplicative and contributes to lengthening the process from Council final action to implementation, in total, there are at least 8 public comment periods if one assumes a regulatory action that encompasses four Council meetings and the existing procedures after final Council action taken under each statute: 4 leading to and including final Council action and 4 subsequent to final Council action. Attachment 1, describing the Pacific Council Groundfish Fishery Biennial Specifications setting process for 2009-10 is a contemporary example of a problematic NEPA compliance process dealing with the implementation delay problem; it shows 632 days between the initiation of the process at the first Council meeting and the first day the resulting regulations were implemented.

A discussion of effort and process duplication problems between the NEPA and MSA requirements can quickly become a discussion of NEPA protocols, since the current procedures have moved to using NEPA documents to satisfy the analytical requirements of MSA. Thus, the lengthier, more complex, and more staff-expensive NEPA process has essentially subsumed the MSA analytical requirements. **[The Regional Councils are a product of MSA, but the IPT must fit the Council's deliberative process into the NEPA procedural requirements, instead of having the NEPA requirements adapted to the Council process.]** While it can be argued that the existing MSA requirements may not be in themselves fully sufficient for a comprehensive review of environmental impacts, the current NEPA compliance protocols include review processes that duplicate what has been, or can be, much more efficiently accomplished in the Council process. **It would be more efficient to incorporate NEPA protocols into the Council's process for complying with MSA, rather than trying to rationalize the Council's actions into a NEPA deliberative process.**

---

<sup>1</sup> For an environmental assessment the 45-day public comment period is not required; however, there has been an increasing trend to mandating an EIS, even for routine fishery specification regulations, such as quotas for particular fisheries **((not true for GMFMC))** that respond to new scientific information on fish stock abundance.

In addition to the increase in time necessary to accomplish a fishery management action under current NEPA compliance protocols, there is a significant increase in staff workload and process compared to what is required under the MSA. This increase has been overly expensive in terms of workload to both Council and NMFS staff resources, with negative opportunity costs on other regulatory activities. Attachment 2, describing the process yielding the 6,000<sup>2</sup> page 2004 Alaska Groundfish Fisheries Final Programmatic Supplemental Environmental Impact Statement document is an example of this problem of enormous document volume and associated huge workload. While there is no accounting of the total number of FTE staff hours spent preparing this document to its final stage, it is commonly accepted that it is excessive compared to original NEPA statutory direction and it came with the cost of addressing many other important, urgent fishery management concerns that were apparent at that time. [some specifics as to why it was some NEPA coordinator's determination that such a document was warranted, could help this paragraph, because I cannot comprehend development of such a document in the Gulf.]

There have also been instances where current compliance with NEPA has fallen short of adequate compliance with MSA in terms of providing comprehensive analysis, or even a full description of alternatives, to Councils prior to their taking final action **((not true for Gulf))**. The MSA process clearly calls for all information to be available to the Councils at the time of a final decision on a recommendation to the Secretary and that the Secretary is to review the Council recommendation on the merits of the administrative record of the Council process. Current protocols using a NEPA document to satisfy MSA analytical requirements can create a problem insuring Council members make a fully informed final decision, in that the NEPA document is formally an agency document that can be modified after Council final action has taken place. There have been instances of additional analysis being added to the NEPA document, alternatives being added, or alternatives previously rejected being refined and used, prior to the Record of Decision stage in the NEPA process—well after Council final action. Taking such information into consideration in the Secretarial review process executed under the MSA represents a serious shortcoming in an efficient process designed to provide Councils the same full spectrum of information at the time of final decision making that is used in approving, disapproving, or partially approving a final Council recommendation. It also represents a serious shortcoming in the spirit of NEPA to provide for comprehensive analysis prior to decision making, as applied to Council decision making. Attachment 3, describing the sequence of events in 2012 -2013 around the New England Fishery Management Council's Framework Adjustment 50 to the Northeast Multispecies FMP is an example illustrating this particular problem.

MSA Section 304(i) (see Attachment 4), included as part of the 2007 Magnuson-Stevens Reauthorized Act, was intended to more closely align the requirements of the MSA and NEPA within NMFS's NEPA procedures (required by 40 CFR Part 1505). This section directs the agency to promulgate final procedures within 12 months of enactment. In December 2008 NMFS issued a proposed rule for this purpose, which was later withdrawn. NOAA's Office of Planning and Policy Integration has been revising NOAA Administrative Order 216-6, Environmental Review Procedures, but to date this task has not been completed. In 2013 NMFS issued a policy directive "specifically to address the unique timing and procedural requirements of the MSA." However, the CCC does not believe the current approach has made the alignment of NEPA and MSA more timely (quicker), a reduction in extraneous paperwork (smaller documents), nor more concise (less process or workload efficient), as called for in Section 304(i). In the opinion of the CCC, the 2013 policy directive effectively describes the current institutional status quo.

---

<sup>2</sup> Many have heard about a NEPA document of about 7,000 pages for this matter. The draft SEIS was approximately 7,000 pages in length.

## Proposal

The CCC proposes that the MSA be amended to address the aforementioned problems by adding a section to the end of Section 303, Contents of Fishery Management Plans that achieves more efficient integration of NEPA intent. This new section would incorporate the key parts of NEPA verbatim, which requires Federal agencies to prepare “a detailed statement” on “the environmental impact of the proposed action” into the MSA. Currently, MSA Section 303(a)(9) requires preparation of a “fishery impact statement” as part of any FMP or FMP amendment. The proposal is to move and expand this section so that it incorporates the critical essence of NEPA including a full analysis of environmental impacts and consideration of alternatives. In addition, some important concepts in the Council on Environmental Quality implementing regulations such as the analysis of cumulative impacts and specifying opportunities for public comment would be added. Importantly, the elements of a fishery impact statement currently outlined in MSA Section 303(a)(9) would be retained in the new section. This new section also makes clear that compliance with these requirements would fulfill the requirements of NEPA. Section 304, Actions by the Secretary, is proposed to be amended to clarify how the review of plans, plan amendments, and proposed regulations would take into account the fishery impact statement. Also, a joint Councils-Secretary process is proposed that will provide detailed guidelines and procedures on achieving the statutory intent of both NEPA and the MSA.

Conceptually, this proposed approach is similar to how the intent and essential components of the Federal Advisory Committee Act (FACA) was incorporated into the MSA. The FACA calls for several requirements to be satisfied prior to a committee providing formal advice to the federal government, including such things as public access to meetings, timely advance notice of meetings, record keeping, balanced membership, and structured procedures; it also has a lengthy process for legitimatizing committees, committee meetings, and committee recommendations. The key features of FACA were incorporated as requirements in the MSA, together with Section 302(i)(1) which states that FACA shall not apply to the Councils, CCC, Scientific and Statistical Committees, or related advisory bodies. Absent this “FACA exemption”, process requirements, delays, and other problems would render the Council role in active marine fishery actions functionally unworkable.

It is important to emphasize that this proposal is not to “get out of” complying with the intent of NEPA, not to avoid a complete and robust analysis of the full spectrum of environment effects of a fishery management proposal, to shortcut a thorough process by which the input of the public and relevant government entities is considered prior to a final decision, or to prohibit any entity from seeking legal relief if they do not believe a full review of environment effects has not occurred. On the contrary, the intent is to mandate that all the important aspects of NEPA compliance are included in a comprehensive and detailed process, that the functional equivalent of full compliance with NEPA statutory language is accomplished, and that these important functions are achieved in a more efficient way than currently administered. **((Consider rewriting as the purpose or goal of this proposal and listed as such at the start of the document.))**

In summary, the intent of this proposal is to

- Incorporate exact or near exact key NEPA language into MSA Section 303, including
  - A reasonable range of alternatives
  - Full analysis of environmental impacts
  - An analysis of cumulative impacts
- Consolidate public comment guidelines currently adopted for NEPA implementation with those in MSA
  - Figure 2 shows a generic timeline for the proposed new process.
- Retain the conservation and fishery participant impact analysis requirements of the current MSA
- Adjust the language in Section 304 regarding Secretarial review of Council actions to include review of analytical documents for completeness of the new requirements

- Insert language making it clear that if the above requirements are accomplished, then compliance with NEPA has been achieved.
- Insert language describing a joint Council and Secretarial process establishing guidelines and regulations to codify the requirements of this new process.

**The specific proposal is as follows.** Yellow highlight has been added where the language is identical to the language in the NEPA. Gray highlight has been added where the language is identical to the language in the current MSA.

## SEC. 303 CONTENTS OF FISHERY MANAGEMENT PLANS

Delete Sec. 303(a)(9)<sup>3</sup> and create new Sec. 303(d)

(d) FISHERY IMPACT STATEMENT – Any fishery management plan (or fishery management plan amendment) prepared by any Council or by the Secretary pursuant to Sec. 303(a) or (b), or proposed regulations deemed necessary pursuant to Sec. 303(c), shall include a Fishery Impact Statement which shall assess, specify and analyze the likely effects and impact of the proposed action on the quality of the human environment.

(1) The fishery impact statement shall describe—

- (A) a purpose of the proposed action;
- (B) the environmental impact of the proposed action<sup>4</sup>;
- (C) any adverse environmental effects which cannot be avoided should the proposed action be implemented<sup>2</sup>;
- (D) a reasonable range of alternatives to the proposed action<sup>2</sup>;
- (E) the relationship between short-term use of fishery resources and the enhancement of long-term productivity<sup>2</sup>;
- (F) the cumulative conservation and management effects,
- (G) economic, and social impacts of the proposed action<sup>2</sup> on—
  - (i) participants in the fisheries and fishing communities affected by the proposed action;
  - (ii) participants in the fisheries conducted in adjacent areas under the authority of another Council, after consultation with such Council and representatives of those participants; and
  - (iii) the safety of human life at sea, including whether and to what extent such measures may affect the safety of participants in the fishery<sup>5</sup>

(2) A substantially complete Fishery Impact Statement, which may be in draft form, shall be available not less than 14 days ((too rigid?)) before the beginning of the meeting at which a Council makes its final decision on the proposal (for plans, plan amendments, or proposed regulations prepared by a Council pursuant to Sec.

303(a) or Sec. 303(c)). Availability of this Fishery Impact Statement will be announced by the methods used by the Council to disseminate public information and the public and relevant government agencies will be invited to comment on the Fishery Impact Statement.

<sup>3</sup> Page 75 of the MSA “Blue Book”

<sup>4</sup> See 42 U.S.C. 4332, Sec. C

<sup>5</sup> See MSA 303(a)(9)

(3) The completed Fishery Impact Statement shall accompany the transmittal of a fishery management plan or plan amendment as specified in Sec. 304(a), as well as the transmittal of proposed regulations as specified in Sec. 304(b).

(4) The Councils shall, subject to approval by the Secretary, establish criteria to determine actions or classes of action of minor significance regarding Section 303(d) (A), (B), (D), (E), and (F), for which preparation of a Fishery Impact Statement is unnecessary and categorically excluded from the requirements of this section, and the documentation required to establish the exclusion.

(5) The Councils shall, subject to approval by the Secretary, prepare procedures for compliance with this section that provide for timely, clear and concise analysis that is useful to decision makers and the public, reduce extraneous paperwork and effectively involve the public, including—

(A) using Council meetings to determine the scope of issues to be addressed and identifying significant issues related to the proposed action;

(B) integration of the Fishery Impact Statement development process with preliminary and final Council decision making in a manner that provides opportunity for comment from the public and relevant government agencies prior to these decision points;

(C) providing scientific, technical, and legal advice at an early stage of the development of the Fishery Impact Statement to ensure timely transmittal and Secretarial review of the proposed fishery management plan, plan amendment, or regulations to the Secretary.

(6) Actions taken in accordance with Sec. 303 procedures shall constitute fulfillment of the requirements the National Environmental Policy Act of 1970 as amended 42 U.S.C. 4371 *et seq.*) and all related implementing regulations.

Sec. 304(a) amended as follows:

(a) REVIEW OF PLANS.—

(1) ...

(2) In undertaking the review required under paragraph (1), the Secretary shall—

...[strike “and” from the end of B and at the end of C replace period with “; and”]

(D) evaluate the adequacy of the accompanying Fishery Impact Statement as basis for fully considering the environmental impacts of implementing the fishery management plan or plan amendment.

Sec. 304(b) amended as follows:

(b) REVIEW OF REGULATIONS.—

(1) Upon transmittal by the Council to the Secretary of proposed regulations prepared under section 303(c), the Secretary shall immediately initiate an evaluation of the proposed regulations to determine whether they are consistent with the fishery management plan, plan amendment, this Act and other applicable law. The Secretary shall also immediately initiate an evaluation of the accompanying Fishery Impact Statement as a basis for fully considering the environmental impacts of implementing the proposed regulations. Within 15 days of initiating such evaluation the Secretary shall make a determination and—

...
