### **Commercial King Mackerel Hook-and-Line Fishing Closing In the Southern Subzone**

NOAA Fisheries will close the southern subzone of the Gulf of Mexico to commercial fishing for king mackerel **effective 12:01 a.m. (local time), February 5, 2015**. The commercial quota of 551,448 pounds for this subzone has been reached.

From November 1 through March 31, the southern subzone is that part of the Florida west coast off Collier and Monroe Counties. Beginning April 1, the southern subzone is reduced to the area off Collier County, Florida, and Monroe County is considered part of the Atlantic group.

During the closure, no commercial fisherman may fish for or keep king mackerel in or from the closed zone. There is an exception for people aboard a vessel that has a charter/headboat permit for coastal migratory pelagic fish and a commercial king mackerel permit. Those people may keep the 2-fish per person daily king mackerel bag limit from the closed zone if the vessel is operating as a charter vessel or headboat. Vessels are considered to be operating as a charter vessel or headboat when they carry a passenger who pays a fee or when more than three people are aboard, including operator and crew.

During the closure, no king mackerel caught in the closed zone may be bought, sold, or traded. This includes recreational and tournament-caught fish. King mackerel that were traded or sold before the closure and held in cold storage by a dealer or processor may still be sold.

This summary is not a substitute for the actual regulations. We encourage you to read the full text of the regulations, available at <http://sero.nmfs.noaa.gov/>.

#### **About Gulf of Mexico Fishery Management Council**

The Gulf of Mexico Fishery Management Council is one of eight regional Fishery Management Councils established by the Fishery Conservation and Management Act of 1976. The Council prepares fishery management plans, which are designed to manage fishery resources within the 200-mile limit of the Gulf of Mexico.
