

Summary of Responses from 4/26/20 - 5/26/20 :

Something's Fishy: Greater Amberjack

What is Something's Fishy?

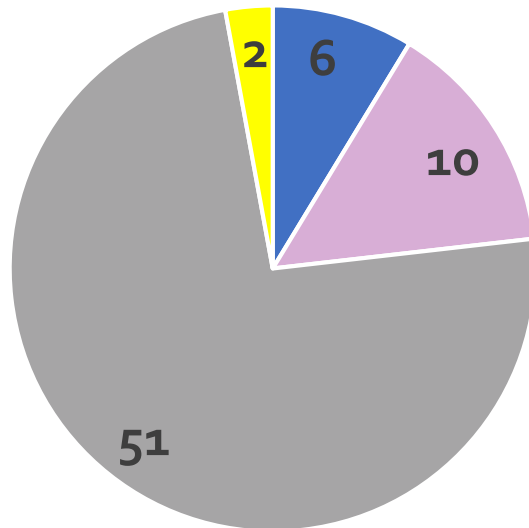

A tool used to gather information on a fish stock from active fishermen on trends or unusual occurrences that scientists and managers may not have observed.

- Responses gathered from April 26, 2020– May 26, 2020
- Final report generated and emailed to stock assessment scientists June 2020.

Respondents

Response by Sector

■ Commercial ■ For-Hire
■ Recreational ■ Other

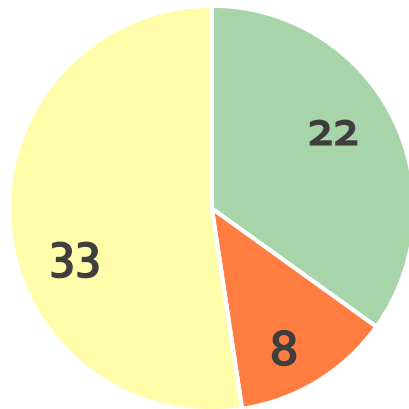

64 Respondents

- Self-identified with sector
- Not limited to a singular response (n=69)

Response Sentiment

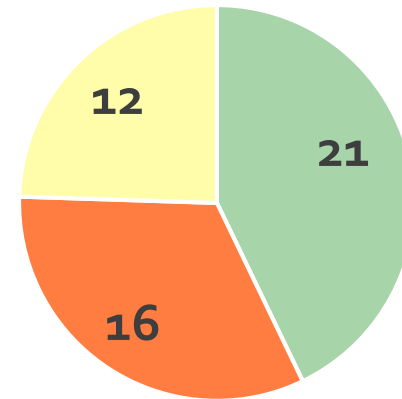

Response Sentiment Based on Manual Analysis

■ Positive ■ Negative ■ Neutral

Manual sentiment analysis showed that a majority of respondents reported a positive or neutral sentiment

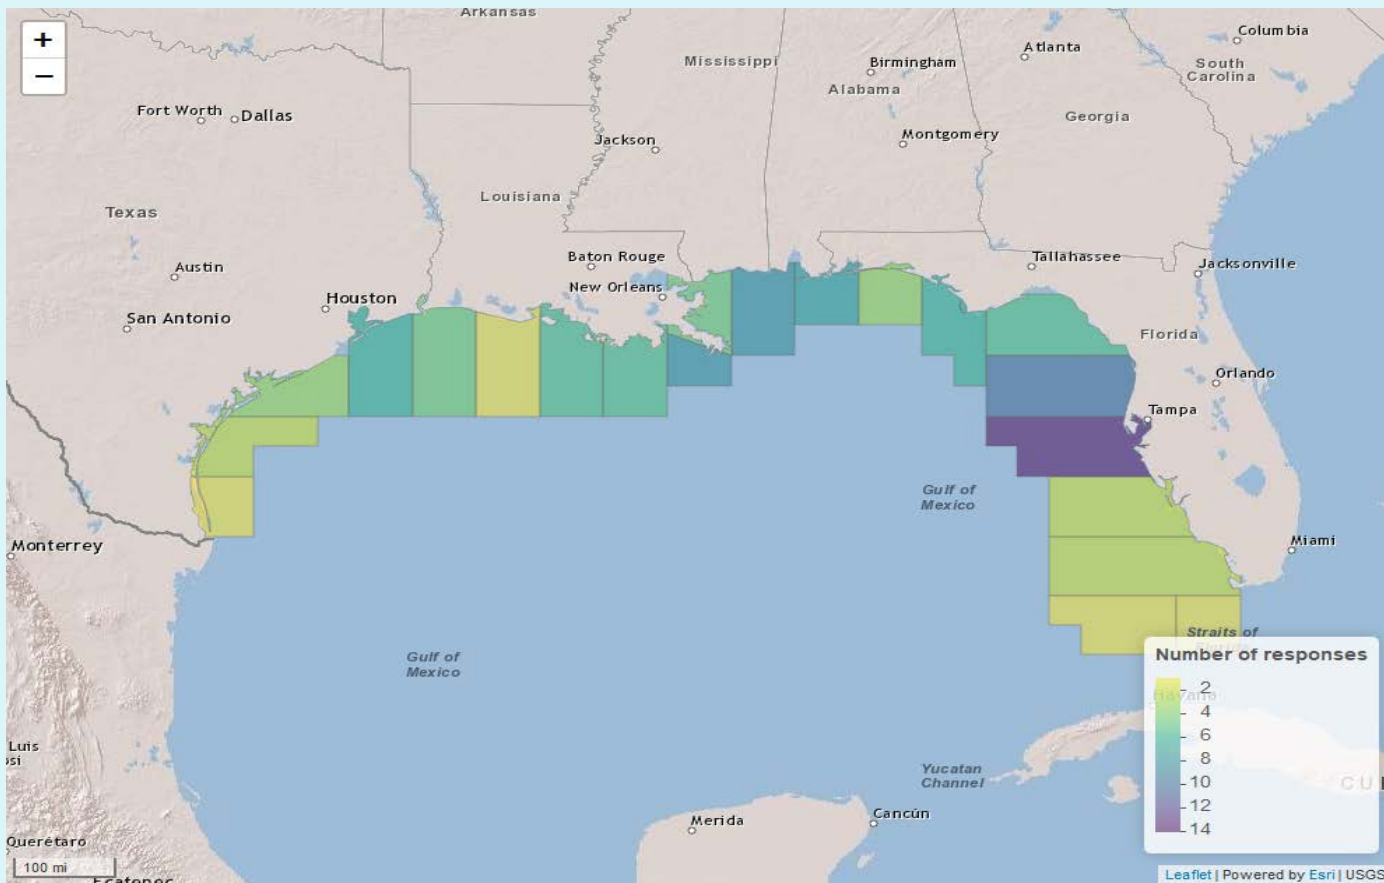

Response Sentiment Based on Automated Analysis

■ Positive ■ Negative ■ Neutral

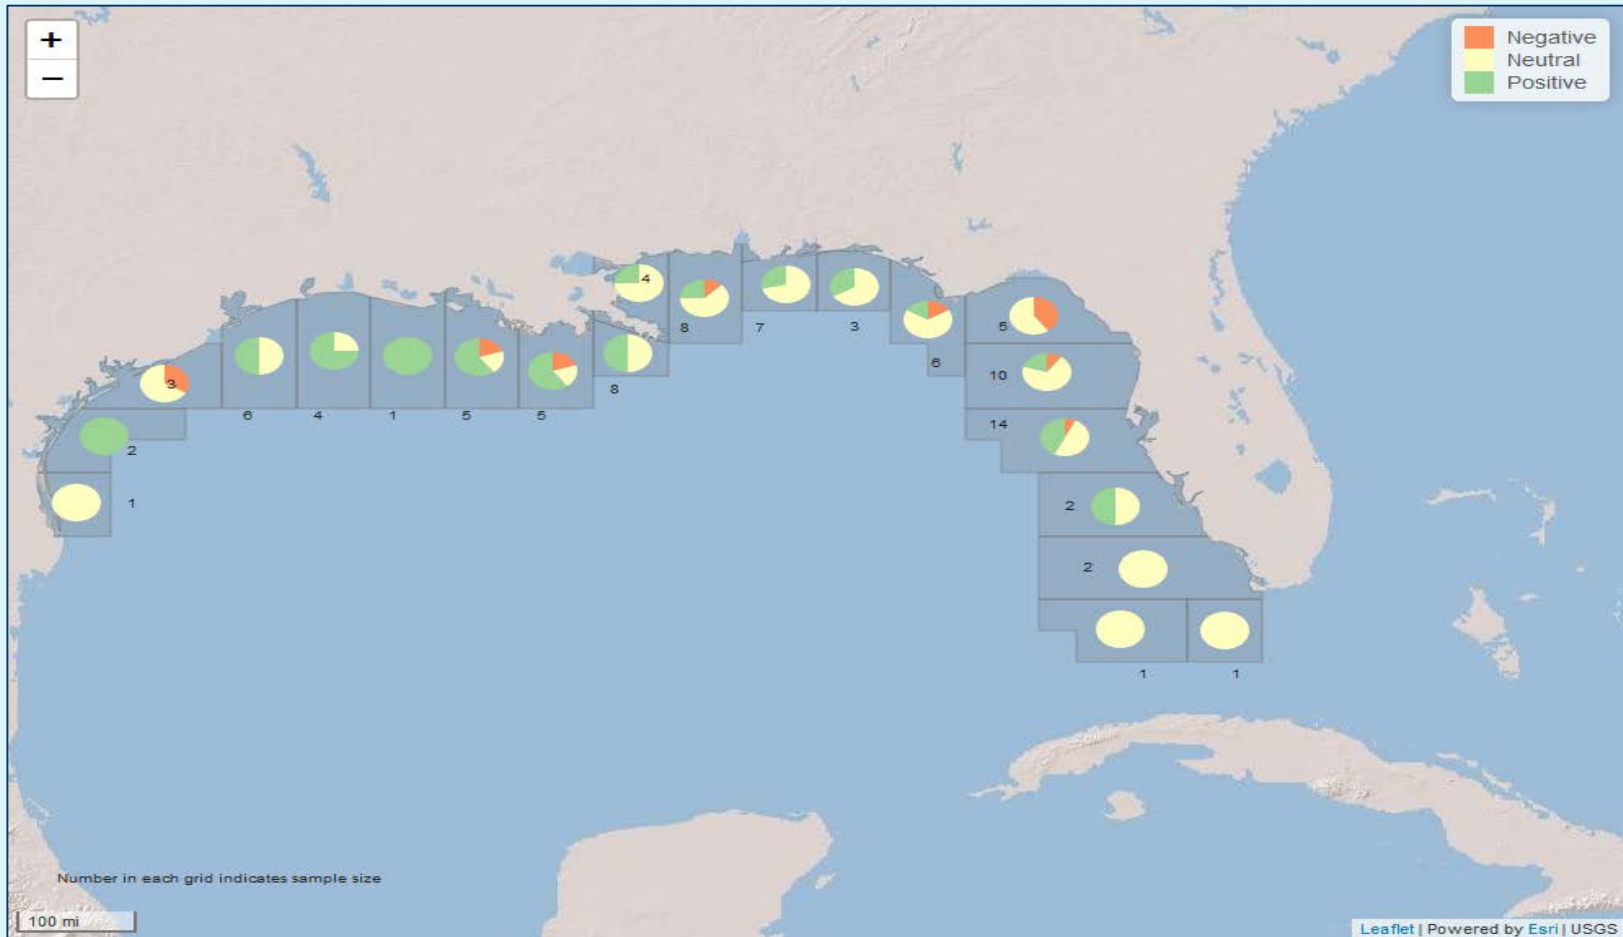

Automated analysis showed a majority of respondents reported a positive or negative sentiment

Response Location

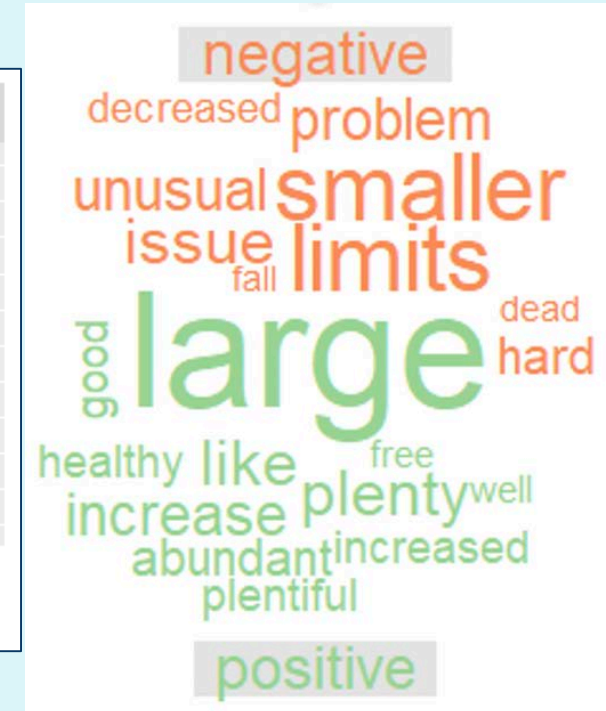

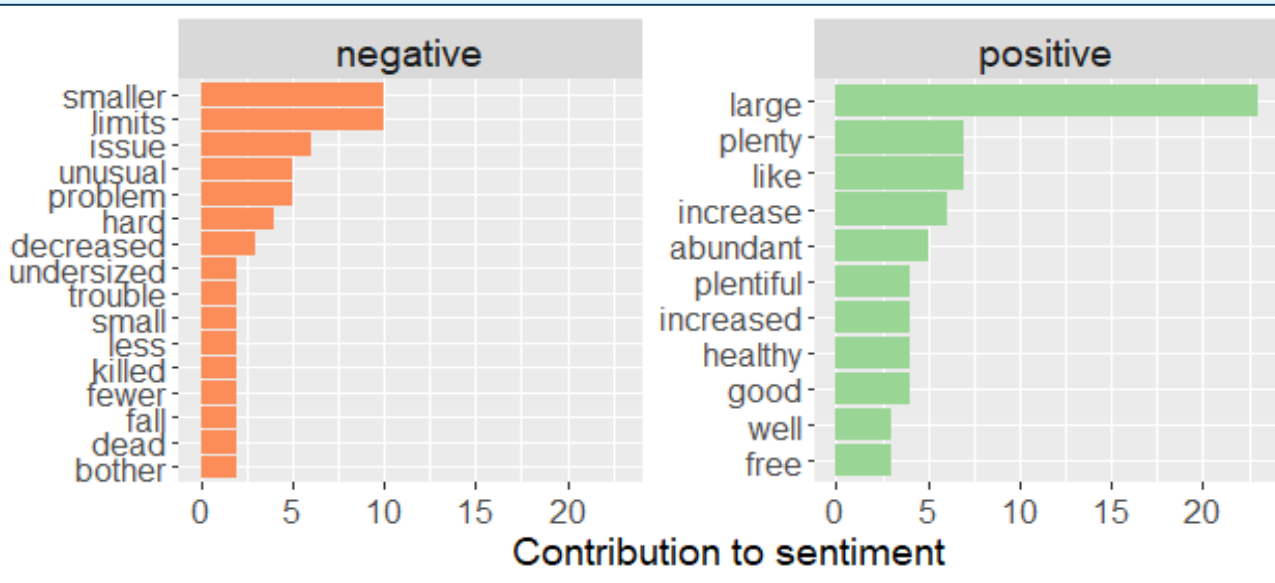

- Most responses were gathered off central Florida and the Panhandle
- A few areas in the western Gulf and in areas off the Florida Keys only received one response

Response Sentiment by Location

- Respondents could report observations for one or more grid locations
- 94 responses were recorded

Automated Analysis

Most frequently used words could indicate that anglers with negative perceptions of the greater amberjack stock were seeing smaller fish and that they were dissatisfied with the size limit.

Manual Analysis

- A majority of neutral comments were critical of management but indicated that greater amberjack are prolific. (In this case, the comments were considered neutral because they indicated a positive trend in abundance but a negative impression of greater amberjack regulations.)
- Some of the comments classified as neutral indicated that amberjack were so abundant that they are an ecological problem or nuisance to fishermen.
- Most of the responses from the western Gulf were classified as positive while responses from the eastern Gulf were more likely to be neutral.
