NOAA Fisheries Seeks Public Comment on Proposed Changes to Gulf Shrimp Management  
Comment period ends October 13, 2015

NOAA Fisheries is seeking public comment on Amendment 15 to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico, U.S. Waters. NOAA Fisheries is also seeking public comment on the proposed rule to implement the management measures contained in the amendment. Amendment 15 proposes to:

- Modify stock status criteria for three species of shrimp (brown, white, and pink):
  - The maximum sustainable yield is the largest average catch that can continuously be taken from a stock under existing environmental conditions.
  - The overfishing threshold determines if the rate of removal of shrimp is too high.
  - The overfished threshold determines if population abundance is too low.
- Make administrative changes to the procedure for modifying management measures.

The Gulf of Mexico Fishery Management Council has submitted Amendment 15 to NOAA Fisheries for review, approval, and implementation. The Notice of Availability for public comment on this amendment published in the Federal Register on August 12, 2015, and the proposed rule published on August 25, 2015. Comments will be accepted through October 13, 2015. We will address all comments specifically directed to either the amendment or the proposed rule in the final rule.

For more information on Amendment 15, please visit the NOAA Fisheries Southeast Region Web site at:
