MEMORANDUM

TO: Carrie Simmons, Executive Director, GMFMC
FROM: Julie A. Neer, SEDAR Coordinator
DATE: February 25, 2021
RE: Appointment of Participants for SEDAR 74 Gulf of Mexico Red Snapper Data Workshop and Assessment Development Team

SEDAR 74 will provide a Research Track assessment of Gulf of Mexico red snapper. The Data Workshop will be held November 2021, the assessment webinars will be held between May and August 2022, and the Review Workshop will tentatively be held January 2023.

Each Cooperator is responsible for appointing individuals to participate in all components of the project. As such, I am requesting the appointment of participants for the several of the Panels associated with SEDAR 74, following Gulf of Mexico Council SEDAR procedures.

As this is a Research Track assessment, we need appointments for the Assessment Development Team (ADT). ADT members will participant in all stages of the process. These participants will serve as the decision-making body for this assessment.

I am also requesting appointments for the Data Workshop stage of the SEDAR 74 process. Ideally, appointees will be providing data, and/or have insight and assessment expertise, which will aid the assessment process.

The suggested maximum number of participants for each Panel is as follows:

Assessment Development Team: 5 participants

Data Workshop Panel: 15 participants (SSC, AP, other data providers)

The Planning Team developed a Suggested Participants List for your consideration when making your appointments to the ADT and the Data Workshop Panel. They included individuals whom they believed can provide data or insights to aid in the analysis and interpretation of the information to be discussed. The Suggested Participants can be found in the table below:

I would appreciate it if this request could be included for discussion at your earliest convenience. Please inform me of the results of your consideration by April 9, 2021.

Thank you for your attention to this matter.
