### **NOAA Fisheries Seeks Public Comment on Proposed Changes to King Mackerel Management**

**Comment period ends November 6, 2015**

NOAA Fisheries is seeking public comment on Framework Amendment 3 to the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and Atlantic Region. NOAA Fisheries is also seeking public comment on the proposed rule to implement the management measures contained in the amendment. Framework Amendment 3 proposes to make the following changes to commercial regulations on king mackerel harvested by gillnets in the Gulf of Mexico (Gulf):

- Increase the trip limit from 25,000 pounds to 45,000 pounds.
- Add an accountability measure to reduce the annual catch limit in the year following an overage.
- Modify electronic reporting requirements to improve timeliness of reporting while reducing redundancy for dealers.
- Implement a landings requirement to renew a gillnet permit.

The Gulf of Mexico Fishery Management Council has submitted Framework Amendment 3 to NOAA Fisheries for review, approval, and implementation. The proposed rule published on October 6, 2015. Comments will be accepted through November 6, 2015. We will address all comments specifically directed to either the amendment or the proposed rule in the final rule.
