NOAA is Seeking Public Comments on Modifications to the Current Federally Permitted Seafood Dealer Reporting Requirements

NOAA Fisheries is seeking public comment on an amendment that would change dealer reporting requirements in the Gulf of Mexico and Atlantic regions. The biggest change addresses the amount of time a dealer has to report a purchase. Dealers would have one week versus the current two weeks to submit purchase forms. The Notice of Availability published in the *Federal Register* on **December 19, 2013** (78 FR 76808). The comment period ends on **February 18, 2014**.

Purpose of the Amendment:

(1) Establishes a new single dealer permit that would be required to purchase products managed in the fishery management plans listed below.

South Atlantic Fishery Management Plans

Coastal Migratory Pelagic Resources
Golden Crab Fishery of the South Atlantic Region
Shrimp Fishery of the South Atlantic Region
Snapper-Grouper Fishery of the South Atlantic
Spiny Lobster of the Gulf of Mexico and South Atlantic

Gulf of Mexico Fishery Management Plans

Coastal Migratory Pelagic Resources
Red Drum Fishery of the Gulf of Mexico
Reef Fish Resources of the Gulf of Mexico

Atlantic Fishery Management Plans

Coastal Migratory Pelagic Resources
Dolphin and Wahoo Fishery of the Atlantic

(2) Purchase forms would be submitted online, once per week. Forms would be due 11:59 p.m., local time, every Tuesday.

(3) Dealers reporting purchases of king mackerel landed by the gillnet sector for the Gulf West Coast Florida Southern Sub-Zone would be required to submit forms daily by 6:00 a.m.

(4) If no purchase is made, a no-purchase report must also be submitted online, once per week.

(5) Delinquent reports automatically result in Gulf of Mexico and Atlantic dealers becoming ineligible to receive the specified federally managed species regardless of any notification by NOAA Fisheries. A dealer would only be authorized to receive the specified federally managed species if the dealer's previous reports have been submitted and received by NOAA Fisheries.

This action will improve the completeness and timeliness of purchase information. Many commercial fisheries close when landings are projected to reach the commercial annual catch limits. The action would require federally permitted dealers to obtain the new dealer permit and submit purchase forms

electronically, once per week. The existing reporting frequency reduces the precision of the projections, often resulting in landings significantly less or greater than the annual catch limits.

In implementing this amendment , NOAA Fisheries intends to use an effective date four months after the date of publication of the final rule (which will mean four months before permits and reporting are required), but not require those entities who already have dealer permits to submit an application for the new generic permit until their current permit comes up for renewal, even if it is well after the effective date.

However, new dealers should be sure to submit an application at least 30 days prior to the date they need the permit issued.

This bulletin serves as a Small Entity Compliance Guide, complying with section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996.

Electronic copies of the amendment and proposed rule may be obtained from the NOAA Fisheries Web site:
