# SEDAR87 Research Track Update

Gulf of Mexico Brown, Pink, and White Shrimp

***SEFSC Gulf Fisheries Branch  
Shrimp Advisory Panel Meeting***

March 2024

# Data Workshop

- Held Post-Data Workshop Webinars
  - Post-DW Webinar I held **November 6, 2023**
  - Post-DW Webinar II held **January 8, 2024**
- Post-DW Webinar III is schedule for the **week of April 22, 2024** to finalize landings data
- Final analytical products for the assessment models
  - Originally due **November 3, 2023**
  - Currently due **January 5, 2024**
  - Landings and dependent products will be submitted ASAP
- Data Workshop report will be finalized soon

# Assessment Webinars

- Not anticipating any further delays in the schedule
  - Starting with environmental indices and VAST, which don't require landings
  - Analysts are working on the assessments
- Pursuing 2 assessment model platforms
  - EDM (Nonlinear time series approach)
  - JABBA (Bayesian state-space surplus production model)
    - VAST indices of abundance (Spatial delta-generalized linear mixed model for multiple categories)
- Assessment Webinars begin **week of May 13, 2024**

# Remaining Assessment Schedule

- Assessment Working Papers due **March 18, 2024**
- Seven assessment webinars are slotted monthly from **May-November 2024**
- Assessment webinars are open to the public, register to attend these [events on the SEDAR website](#)
- Final Assessment Process Reports will be distributed **February 28, 2025**
- Review Workshop will be held the **week of April 21, 2025**
- Complete Assessment Report submitted **May 30, 2025**
