Note: Landings include data from MRIP or MRFSS calibrated to MRIP, headboat, and LA Creel for all of 2016. TXPW data is available from January through May 14, 2016. Greater amberjack and gag landings exclude Monroe County, Florida. November/December MRFSS landings from the SEFSC are not available at this time therefore MRIP landings were used for gray triggerfish for November/December landings.

<sup>1</sup> Sources: SEFSC MRIP-Based Recreational ACL Data (MRIP, SRHS Waves 1-6), LA Creel, TPWD for Texas private and charter 2016, parsed to wave and assigned weights using 2015 ACL Data. Note: Charter landings outside the federal season are included against the Private angler component data.

Note: As of May 11, 2017 the king mackerel fishery zones were redefined, and the Florida east coast subzone was removed. As such, the quota previously associated with the Florida east coast subzone was distributed to the other remaining zones. This allowed for the reopening of zones with sufficient quota to harvest.
