# Gulf of Mexico Rec Fish Initiative

## **NOAA FISHERIES**

**SERO**

# Goal

The goal of this initiative is to evaluate the efficacy of current Federal recreational reef fish management in the Gulf of Mexico and develop future management approaches and guidance intended to prevent overfishing, address discards and/or discard mortality, account for uncertainty in recreational data, and provide for innovative new management approaches to regulate Federally managed recreational fisheries.

**FISHERIES**  
**SERO**

# Initiative

1. Development, review, and revision of goals and objectives for recreational fisheries management;
2. A review of the status of Federally managed species in the Gulf of Mexico that are highly sought after by recreational anglers, including recreational sources of directed and bycatch mortality;
3. A review of recreational management measures, including how management measures have changed over time;
4. Assessment of the performance and efficacy of recreational accountability measures and recommended improvements;

FISHERIES**

**SERO**

# Initiative

5. Evaluation and consideration of harvest control rules (i.e., pre-agreed guidelines) for setting bag, size, and season limits;
6. Scientific recommendations to the Council for addressing variability and uncertainty in recreational catch estimates, including use of multiple years of data, identification of catch estimates that are the result of low sample sizes or outliers, and statistical recommendations and guidance for how such approaches could be implemented; and,
7. Exploration of innovative new management strategies.
