**Agenda Item V:** Draft Document: Coastal Migratory Pelagics Amendment 32

**Timeline Status:** Presentation, discussion, and recommendations

**Council Input and Next Steps:** Council staff will present a draft document to modify catch limits, size limits, possession limits, and language to the CMP framework procedure. Proposed catch limits for Gulf cobia have been modified based on the recent SEDAR 28 stock assessment update and adjusted to account for changes in the recreational data collection to MRIP-FES. Since Gulf cobia is jointly managed with the South Atlantic Council, modifications to the ACL apportionment to the east coast of Florida are also considered. Modifications to size and possession limits are also being considered to reduce fishing mortality and end overfishing. Additionally, modifications to the CMP framework procedures are being considered to clarify the language about the responsibilities of each Council in the management of Gulf cobia. The Committee should review the draft document and provide feedback on the range of actions and alternatives.
