

SEDAR Committee: Action Guide & Next Steps for Tab I

Agenda Items IV-V: Summary of SEDAR Steering Committee meeting and Review of the Gulf SEDAR Schedule (Tab I, Nos. 4 & 5)

Timeline Status: Review and provide guidance on the Gulf SEDAR Schedule

Council Input and Next Step: Council staff will provide an overview of the SEDAR Steering Committee meeting held via webinar on September 24, 2018. Council staff will also provide an overview of the Gulf SEDAR Schedule (Tab I, No. 5). During the SEDAR Steering Committee meeting, concern was expressed for the MRIP calibration updates and incorporating the various Gulf states data collection programs for red snapper and other species. The SSC received a presentation on the MRIP calibration updates, and provided a recommendation on how to proceed with MRIP calibrations on gag, greater amberjack, gray snapper, vermilion snapper, and red snapper (Tab B, No. 9). The Committee should discuss this recommendation and determine if they agree with the SSC, or want to provide different guidance to staff on how to proceed.
