

SEDAR 68 Pre-Data Workshop Discard Mortality Webinar
Gulf of Mexico and Atlantic Scamp
February 10, 2020 from 11:00 AM to 12:30 AM
Summary Report

The SEDAR 68 Discard Mortality Working Group (WG) convened to determine what data were available for determining the discard mortality rate(s) for scamp in the Gulf of Mexico (Gulf) and Atlantic. Work done in SEDAR 33 (Gulf Gag Grouper) may translate to some degree for other Mycteroperoids, like scamp. Mote Marine Laboratory noted several hundred observations of scamp discards from commercial vessels in the Gulf and Atlantic, and will also provide a working paper detailing these observations. The South Atlantic Fishery Management Council also has angler-reported release condition information from a mobile application; these data would only be applicable for the South Atlantic region from North Carolina south to the Florida Keys.

The in-person Data Workshop will be in Charleston, SC from March 16-20, 2020.

Participants:

Beverly Barnett	Andy Ostrowski	Thomas Sminkey
Alan Bianchi	Kate Overly	Sarina Atkinson
Gregg Bray	Will Patterson	Larry Beerkircher
Steve Brown	Sean Powers	Walter Bublely
Jeff Buckel	Jeff Pulver	Matt Campbell
Julia Byrd	Mike Rinaldi	Kelly Fitzpatrick
Dave Chagaris	Julie Simpson	Dawn Glasgow
Amy Dukes	Tracey Smart	Vivian Matter
Eric Fitzpatrick	Ted Switzer	Randy McKinley
Chris Gardner	Kevin Thompson	Matthew Nuttall
Dominique Lazzarre	Jim Tolan	Jennifer Potts
Robert Leaf	Beth Wrege	Kayla Rudnay
Sue Barbieri	Chris Andrew	Skyler Sagarese
Stephanie Martinez	Jimmy Hull	Molly Stevens
Kevin McCarthy	Ryan Rindone	Michelle Willis
