

**Shrimp Committee
Action Guide and Next Steps for Tab D**

Agenda Item IV: Presentation on Gulf Shrimp Fishery Data Collection and Reporting

Timeline Status: Information, discussion, and feedback

Council input and next steps: The SEFSC will present on analytical requirements, program updates, and reporting options for the Gulf shrimp fishery. Current vessel reporting will be impacted as cellular reporting through the 3G network is being phased out. The SEFSC has provided background information (Tab D, No. 4b) to the Committee further outlining analytical requirements and reporting options. The Committee should consider the presentation, review the background information, ask questions of SEFSC staff, and provide feedback to the SEFSC on how these changes will affect shrimp industry participants in the Gulf. The Committee may consider development of an amendment to address the reporting options presented by the SEFSC.
